

**1988 MEETING OF THE AMERICAN SOCIETY OF ZOOLOGISTS
and
AMERICAN MICROSCOPICAL SOCIETY, ANIMAL BEHAVIOR SOCIETY,
THE CRUSTACEAN SOCIETY, INTERNATIONAL ASSOCIATION OF ASTACOLOGY,
SOCIETY OF SYSTEMATIC ZOOLOGY, AND WESTERN SOCIETY OF NATURALISTS**

**SAN FRANCISCO HILTON & TOWERS
SAN FRANCISCO, CALIFORNIA
DECEMBER 27 - 30**

Housing Rates:

\$66 Single, Double, Triple & Quad

Call for Papers: April 1988

Abstract Deadline: August 8, 1988

For Oral and Poster Presentations

SYMPOSIA/WORKSHOPS:

Recent Developments in the Study of Animal Migration
Parasites and Sexual Selection

Evolving Concepts of Chemical Mediation: A Symposium in
Honor of Howard A. Bern

Marine Invertebrate Allorecognition and the Evolution of Immunity
Concepts of Efficiency in Biological Systems

Concepts of Adaptation in Aquatic Animals: Deviations from
the Terrestrial Paradigm

Cellular and Molecular Biology of Pattern Formation

Developmental Neurobiology of the Cnidaria

Antarctic Marine Biology

Chemical Factors that Influence the Settlement and Metamorphosis of Marine
Invertebrate Larvae

Cracking a Black Box: Field Inferences in the Ecology of Marine Invertebrate Larvae

Species and Evolution in Clonal Organisms

Biology of Nonmammalian Chordate Testis

A History of Regeneration Research

Science As A Way of Knowing — Cell and Molecular Biology

Sex Attraction, Mating Behavior and Insemination in the Crustacea

The Complete Biology of Giant Kelp

Workshop on Science Comes to California

Workshop on Research-Education at Small College and Universities: Quality Science on
a Frayed Shoestring

Hosted by the California Academy of Sciences
Daphne G. Fautin and Ralph I. Smith
Co-Chairpersons of the Local Arrangements Committee

SAN FRANCISCO

**NUMEROUS SOCIALS, SPECIAL PROGRAMS
COMMERCIAL EXHIBITS
JOB PLACEMENT SERVICE**

The journals of the British Ecological Society

Journal of Ecology

Edited by **J.A. Lee, B. Moss and J. White**

The Journal of Ecology is one of the world's oldest and most respected publications in the science. The objects of the journal are: (1) to foster and promote the study of vegetation and ecology, especially in the British Isles; (2) to afford an outlet for original work on these subjects; (3) as far as possible to present a record of the commentary on the progress of these studies throughout the world. The journal includes the series Biological Flora of the British Isles, which appear in most issues of the journal but are also available as separate offprints on standing order.

Journal of Animal Ecology

Edited by **L.R. Taylor and J.M. Elliott**

This leading international journal publishes papers on original research in all branches of animal ecology. A balance is sought between aquatic and terrestrial environments, between invertebrates and vertebrates, and between theoretical, experimental and analytical approaches to soundly-based field data. Occasional purely descriptive, theoretical or review papers may be published at the discretion of the editors on animals or concepts of special interest or as part of an extensive development of a subject or as an adjunct to a long-term project.

Journal of Applied Ecology

Edited by **W.C. Block and J. Miles**

The journal publishes the results of original research in which ecological ideas and methods are applied to the study, conservation, management, control, development and use of natural resources in the widest sense. The editors select for publication only material of the highest scientific standards and this policy has attracted contributions by the world's leading authorities.

Functional Ecology

Edited by **P. Calow and J. Grace**

Functional Ecology publishes short, original papers in a wide range of ecological topics, but particularly emphasizing the fields of physiological, biophysical and evolutionary ecology. Papers may describe experimental, observational or theoretical studies on terrestrial, freshwater or marine systems. The Editors are especially keen to publish papers that blend between these subject areas. Work that is purely descriptive and/or concerned exclusively and specifically with the population dynamics of organisms will not be accepted unless it sheds light on those specific areas mentioned above.

Subscription Information

The **Journal of Ecology** and **Functional Ecology** are published quarterly and the **Journal of Animal Ecology** and **Journal of Applied Ecology** are published three times a year. The subscription rates for 1988 are, for each one: £84.00 (UK), £101.00 (overseas), US\$171.00 (USA & Canada) post free. Subscriptions and free specimen copies are available from:

Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England.

Phycologia

Published for the International Phycological Society

Editor

Dr Wm. J. Woelkerling *Department of Botany, La Trobe University,
Bundoora, Victoria, Australia 3083*

This is the official journal of the International Phycological Society, dedicated to the promotion of phycology and the encouragement of international cooperation among phycologists and phycological institutes. The purpose of *Phycologia* is to serve as a clearing house for phycological news and information. In addition to research papers and occasional review articles it also publishes information on meetings and excursions, reports from laboratories and institutions, and book reviews. Original contributions are accepted on a wide range of subjects provided they are of international interest and make a significant contribution to the study of phycology.

Subscription Information

Phycologia is published quarterly. Subscription rates for 1988 are £98.00 (UK & overseas), US\$166.00 (USA & Canada) post free.

Order Form

Please tick the appropriate box

- I would like to subscribe to *Phycologia* and I enclose my remittance for the current volume
- I would like a free specimen copy of *Phycologia*

From Woods Hole Oceanographic Institution, a journal devoted to Marine Science and Policy
(distributed by Cambridge University Press):

OCEANUS

edited by Paul Ryan

Oceanus is published quarterly by Woods Hole Oceanographic Institution, one of the most active and reputable centres of ocean sciences in the world; thus it is in a unique position to monitor significant ocean research and marine policy worldwide. Every issue of Oceanus contains articles written by the world's leading marine scientists. Articles that will keep you up-to-date and inform you of all the latest developments in areas that interest you.

Subscriptions for 1988 are only £20 for individuals and £37 for institutions – PRICES HAVE BEEN HELD FOR 1988! To obtain your copy, send payment to the address below (cheques payable to Cambridge University Press)

"For anyone who loves the sea and whatever moves upon it, OCEANUS seem to me a 'must'. It is written for the layman, but its articles carry the authority of that great research institution at Woods Hole"
**SCIENCE EDITOR,
NEW YORK TIMES**

1987 issues of Oceanus:
Spring 1987; **Japan and the Sea**; Summer 1987; **The Galapagos Marine Resources Reserve**; Autumn 1987; **A General Issue covering TBT in paint, Columbus' Voyage, Siharo Airport in Japan, Sealevel rise, Chernobyl aftereffects; Winter 1987/8; The Antarctic**

To subscribe send payment to The Journals Publicity Department, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, England, stating where you saw this advertisement.

Polar Record

Editor: Dr Bernard Stonehouse
Scott Polar Research Institute,
Cambridge CB2 1ER, U.K.

Polar Record is published four times yearly, in January, April, July and October, from the Scott Polar Research Institute. Devoted to polar and sub-polar research, it covers both ends of the earth and a wide range of disciplines from archaeology to zoology, including glaciology, geophysics and other earth sciences.

The journal includes papers on current research, political and legal issues, short notes, reviews of new books, letters, brief topical items, obituaries, and reports from *SCAR Bulletin*, which records the activities of the Scientific Committee on Antarctic Research.

Polar Record is distributed internationally, keeping its readers aware of contemporary developments in polar and sub-polar regions, and providing a valuable source of historical reference. The annual subscription is only £25.00 for individuals, and £35.00 for institutions.

Recent and forthcoming topics:

The growth, structure, and disintegration of Arctic ice shelves -

M. O. Jeffries

Attraction of polar bears to offshore drilling sites in the eastern Beaufort Sea - *Ian Stirling*

Greenland: a country in transition - *Tom Høyem*

The Antarctic minerals regime negotiations - *Peter Beck*

Control of spring run-off in northern rivers: the ice-veil concept -

G. S. H. Lock

Assessment of a small snowmobile for long-distance unsupported travel - *J. R. Oszczewski, J.*

B. Cain and L. D. Reed

Substantial changes in the coastline of Antarctica revealed by satellite imagery - *J. G. Ferrigno*

and W. G. Gould

Soviet proposals for the Arctic; a policy declaration by Mr Gorbachev - *T. E. Armstrong*

Polar cap and other auroral events observed from Spitzbergen - *D. A. R. Simmons and J. K.*

Henriksen

The ARA *Islas Orcadas* marine geology coring programme: a research bibliography - *D. S.*

Cassidy

Sea ice conditions during an early spring voyage in the eastern Weddell Sea, Antarctic - *H.*

Eicken, T. C. Grenfell and B. Stonehouse

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium which is open to the public.

The Marine Biological Association, under the direction of its Council, has undertaken research in all branches of marine science and many of the results are published in this journal. An account of the history of the first hundred years of the Association and Journal may be found in Vol. 67 (pp. 463 and 465). Summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has been grant-aided through the Natural Environment Research Council.

In 1988 an agreement was reached between the MBA Council and the Natural Environment Research Council to merge a large part of the Plymouth Laboratory with the NERC's Institute for Marine Environmental Research, which had been in Plymouth since 1971. The new laboratory is known as the Plymouth Marine Laboratory and consists of the staff of the two laboratories housed in both buildings. The research programme of the Plymouth Marine Laboratory includes both basic research into all aspects of the sea and marine animals and plants, and also multidisciplinary research on the more applied aspects of marine science, some of which is commissioned by government departments.

The Marine Biological Association still retains the lease of the building on Citadel Hill and continues as a scientific society publishing its own Journal, running the public Aquarium, organising scientific meetings and managing a small group of research fellows and scientific visitors.

TERMS OF MEMBERSHIP

£

Annual Members, receiving the Journal	per annum	25.00	
Annual Members, without the Journal	per annum	3.00	(£10 from 1 January 1989)
Founders		100.00	
Governors		500.00	

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges; they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscriptions paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.

The *Journal of the Marine Biological Association* is published quarterly. The subscription price of volume 68, 1988 to non-members of the Association is £122 within the UK and £134 outside the UK but excluding North America. Subscription price in the USA and Canada is US \$265. The above prices are payable in advance and include postage. Single parts cost £34 (US \$73 in USA and Canada) plus postage. Subscriptions may be sent to any bookseller or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, or in USA and Canada, to Cambridge University Press, 32 East 57th Street, New York, 10022. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in the USA and Canada to *Journal of the Marine Biological Association*, Cambridge University Press, 510 North Avenue, New Rochelle, NY 10801. All orders must be accompanied by payment.
