International Studies of the Minimum Data Set: The InterRAI Experience

Études internationales sur le Minimum Data Set: l’expérience de interRAI
The Canadian Journal on Aging is a refereed, quarterly publication of the Canadian Association on Gerontology. It publishes manuscripts on aging concerned with biology, educational gerontology, health sciences, psychology, social sciences, and social policy and practice. Acceptance or rejection of manuscripts will be on the recommendation of Editors representing the five divisions of the CAG, in consultation with reviewers. Normally, two or more reviewers, in addition to the Editors, will review the manuscript. The Canadian Association on Gerontology and the Editors accept no responsibility for views and statements of the authors.

Published quarterly by the Canadian Association on Gerontology Members of CAG, membership $135.00 (www.cagac.ca) includes $38 for the Journal Annual Subscription: (+ 7% GST)

Measuring Health Outcomes for Older People Using the Sage Database
Giovanni Gambassi, Kate L. Lapane, Antonio Sgadari, Francesco Landi, Vincent Mor, and Roberto Bernabei

Outcome Measures for Use with Home Care Clients
John N. Morris, Iain Carpenter, Katherine Berg, and Richard N. Jones
The Canadian Journal on Aging acknowledges the funding support of Health Canada's International Year of Older Persons program, the Providence Centre Foundation and interRAI in the production of this special Supplement. InterRAI is a 20-country not-for-profit, research network, and the papers published in this issue are the result of the collaborative efforts of its members. InterRAI and the Canadian Institute for Health Information (CIHI) have recently formed a partnership aimed at supporting the broad implementation of interRAI's assessment systems for home care and long-term care facilities in Canada (see "http://www.interrai.org"). The Canadian Collaborating Centre – interRAI, Providence Centre, Toronto, represents interRAI in Canada. The Journal acknowledges the work of its Director, John P. Hirdes, in soliciting these manuscripts and submitting them collectively to the Journal for peer review. The papers in this issue were originally presented at interRAI meetings in Sienna, Italy and Toronto, Canada. The results and conclusions contained herein are those of the authors. No official endorsement by Health Canada is intended, nor should it be inferred.
