The Official Journal of the International Psychogeriatric Association
Better Mental Health for Older People

Special Issue: Social Aspects of Dementia and Dementia Practice
Guest Editors: Irja Haapala, Simon Biggs, and Susan Kurrle
Scope and contributions

International Psychogeriatrics is written by and for those doing clinical, teaching, and research work with older people. It is the official journal of the International Psychogeriatric Association (IPA) and is published by Cambridge University Press, Cambridge, UK. Although it is primarily concerned with psychogeriatrics, the journal welcomes contributions from all across the field of mental health and aging. Original research papers are particularly welcome.

Contributions include original research articles, reviews of the literature, book reviews, letters to the editor, and editorials. Apart from editorial and book reviews, which are commissioned, contributions to International Psychogeriatrics are spontaneously solicited and submitted by authors. Papers are usually reviewed by two expert reviewers selected by the Editor-in-Chief. At present, about one-third of the papers submitted are accepted for publication. The Journal’s Science-Center India impact factor is 2.427 (2016).

Submission of a paper implies that it is neither under consideration for publication elsewhere, nor previously published in English. Manuscripts must be formatted double-spaced with ample margins on all sides and the pages should be numbered.

International Psychogeriatrics is abstracted and indexed in Social Services Abstracts, Current Contents: Social & Behavioral Sciences, Psychological Abstracts, Cumulative Index to Nursing & Health Information Database (CINAHL), Sociedad Iberoamericana de Información Cientifica (SIIC), Sociedad Española de Psicología de la Envejecimiento (SEPE), AgeLine, and Index Medicus/New Literature. This journal is included in the Cambridge Journals Online service which can be found at journals.cambridge.org/ipg. For further details including contact information for the editorial board, please see the journal website.
