

The North American Conference on British Studies

The *Journal of British Studies*, founded in 1961, is published by the University of Chicago Press under the auspices of the North American Conference on British Studies (NACBS). It was the result of the imaginative generosity of a Trinity College alumnus, Frederick E. Hasler (Hon. LL.D. 1957), who contributed funds to the college for the specific purpose of establishing a learned periodical in the field of British history.

The North American Conference on British Studies is a scholarly society affiliated with the American Historical Association and open to anyone in the United States and Canada interested in British civilization in its several aspects: historical, archaeological, literary, artistic, political, and sociological. Its North American constituency comprises about eight hundred members drawn from the fifty states and ten provinces. Affiliated with the parent organization are seven regional conferences (New England, Middle Atlantic, South, Midwest, Western, Pacific Coast, and Northwest) each having its own offices and programs and with a combined membership of more than two thousand. The Conference convenes at least once a year in the autumn, usually in joint session with one of its regional affiliates. It seeks to encourage the serious study of British history, literature, and politics, as well as allied subjects, and among the general reading public through meetings, book prizes, and association with likeminded organizations in North America and Britain and through its publication program.

The Conference sponsors a wide variety of publications. Another journal, *Albion*, issued four times a year at Appalachian State University, Boone, North Carolina, and sent to all members of the parent organization, includes articles, proceedings of all meetings, and book reviews. The Conference's newsletter, the *British Studies Intelligencer* also sent to members, is published at Georgetown University, and contains notices of meetings devoted to British studies, news of appointments, moves, and retirements, and notes on current publications and research in progress. Other publications appear periodically and will be noted at such times.

The Conference awards the following book prizes: the British Council Prize in the Humanities (a round-trip ticket on British Airways and a two-week, all-expenses-paid trip to Britain), awarded through an annual grant by the British Embassy, Washington, D.C., in association with the British Council in the United Kingdom, and given to the best book published in the preceding year by a North American scholar on any aspect of British studies; the John Ben Snow Prize in History and the Social Sciences (\$750), made possible by an annual grant from the Snow Foundation and given for a book in British history, politics, economics, or the history of ideas; and the Walter D. Love Memorial Prize (\$150) for the best scholarly article in any field of British history. Nominations for any of these prizes may be made to the Executive Secretary of the NACBS, Professor George Behlmer, Department of History, University of Washington, Seattle, Washington 98195. Authors must be residents of Canada or the United States, but their work may appear either in North America or abroad.

Information about membership in the NACBS can be found on the copyright page of this journal.

G.K. Chesterton is widely regarded as the most satisfying and insightful commentator on Dickens. These 23 essays, written as prefaces for Everyman's Classic Library editions of Dickens's novels, contain some of Chesterton's most vivid and involving discussion of Dickens, as well as fuller consideration of the later novels than can be found in his famous study, *Charles Dickens*. Infused throughout with Chesterton's firm beliefs on everything from the meaning of life to Dickens's intentions, *Chesterton on Dickens* holds as much interest for the Chestertonian as for the Dickensian.

Merchants and Revolution

Commercial Change, Political Conflict, and London's Overseas Traders,
1550-1653

Robert Brenner

Robert Brenner offers a largescale reinterpretation of the transformation of English commerce in the century after 1550. He reveals that distinct social groups of merchants took charge of successive phases of worldwide expansion. Brenner shows that the profound political struggles that rent London society in the middle part of the seven-teenth century crucially expressed the fundamental conflict between privileged company merchants who had developed rich trades to the Levant and East Indies and low-status outsiders who had developed American colonial commerce.

Brenner demonstrates the enormous importance of London merchant politics for national political developments between 1621 and 1653. He discloses that conflicting merchant groups played a decisive role in determining the character and outcome of the struggle between Parliament and the king in 1641-2. In an extended "Postscript," Brenner specifies the implications of his work for the overall interpretation of seven-teenth century revolutions.
