Public Health Nutrition

Public Health Nutrition provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Contents

- Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- Editorial express the opinion of the journal, as represented by its editors. Opinions, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- Position papers, including declarations and other statements of policy, may be invited or unsolicited.
- Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- Letters to the Editors are usually in response to material published in PHN. Submissions are sent to the author for comment and, when possible, published together with the author’s reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the Editorial Office on phn.editoffice@cambridge.org regarding any other way of submitting.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be evaluated externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the ‘License to Publish’ (in lieu of copyright transfer), available at https://journals.cambridge.org/PHN. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Proofs: Correspondence and proofs for correction will be emailed to the corresponding author. The corresponding author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of the original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Notes for Authors

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, usually following the internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusions, Acknowledgements, and sub-headings as appropriate). Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasizing that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki (as revised in 2013) for experiments involving humans.
4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided external to the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the full Directions to Contributors.
6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise title that is comprehensible without reference to the text. Longer tables may be published only in online publications.
7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Public Health Nutrition

Volume 2018, Part 1
ISSN: 1368-9800
Eighteen issues per year

Aims and Scope

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, comments, and correspondence, with a specific focus on nutrition-related public health. The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related information, implementation of programs and interventions, and sustainability of dietary patterns, food systems and dietary and political determinants of nutrition-related public health, and dietary and political determinants of health outcomes.

The Nutrition Society

The society has as its objective the advancement of the scientific study of nutrition and its application to the maintenance of human and animal health.

Publications of The Nutrition Society and application for membership are available from the Honorary Secretary, The Nutrition Society, 10 Cambridge Court, 210 Shepherd Bush Road, London W6 7NJ, UK. Telephone: +44 (0)20 7762 6228, Fax: +44 (0)20 7762 1797.

Full Directions to Contributors

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutrition.org.uk/). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention will be directed to their contributions will improve clarity. On acceptance, all manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the Editorial Office on phn.editoffice@cambridge.org regarding any other way of submitting.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial) sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information at the initial submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, usually following the internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusions, and sub-headings as appropriate). Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasizing that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki (as revised in 2013) for experiments involving humans.
4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided external to the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the full Directions to Contributors.
6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise title that is comprehensible without reference to the text. Longer tables may be published only in online publications.
7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise requested. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of the original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
