Life Sciences
Books and Journals from Cambridge University Press

Cambridge is one of the leading publishers in ecology and conservation biology and publishes high quality texts and research across the breadth of the life sciences, focusing particularly on animal behaviour, biological anthropology, evolutionary biology, computational and systems biology, as well as statistics and professional development titles for biologists.

We also have an extensive portfolio of established journals in agriculture, ecology and conservation, and animal science.

For further details visit:
cambridge.org/core-life-sciences
Aims and Scope
Established in 1910, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high quality and original research papers, critiques and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the invertebrate ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Editor-in-Chief
Dr Paul De Barro
CSIRO Health & Biosecurity, Brisbane, Queensland 4001, Australia
Email: entomlog@csiro.org

Subject Editors
Dr S. Macfadyen, CSIRO, Ecosystem Sciences, Australia
Dr N. V. Mylning, University of Copenhagen, Denmark
Professor B. Nault, Cornell University, USA
Dr D. Perez-Staples, INIRETECA, Universidad Veracruzana, Mexico
Dr C. Robins, University of Melbourne, Australia
Dr E. Rodatikis, National Agricultural Research Foundation, Greece
Dr Zhentao Sheng, University of Chicago, USA
Professor P. Stevenson, Royal Botanic Gardens, Kew, UK
Professor J.-H. Sun, Chinese Academy of Science, China
Dr W.T. Tay, CSIRO Black Mountain Labs, Australia
Dr L. Thommen, University of Melbourne, Australia
Professor P. Temate, University of Malaya, Malaysia
Professor M. Isman, University of British Columbia, Canada
Dr D. Vieites, University of California, USA
Dr M. Yazdani, University of Tehran, Iran
Dr D. Krzic, CSIRO Black Mountain Labs, Australia
Dr W. Zhang, China Forestry Science Institute, China
Professor S. Li, Shanghai Institutes for Biological Sciences, China
Professor Y. Lu, Chinese Academy of Agricultural Sciences, China

Stylus of Paper
Bulletin of Entomological Research publishes two types of paper:
• Full research papers
• Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.

We also welcome "Letters to the Editor" with comments on recently published papers.

Manuscript Preparation

Language
Manuscripts should be in English.

Manuscript context
Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

• The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings

• Acknowledgements (if any)
• References (for further information about presenting references, please see below)

• Tables, either at the end of the manuscript or as separate files

Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.

Illustrations should be submitted as separate files in TIFF or EPS format but captions should be listed at the end of the manuscript text.

Abstract
Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References
References must be based on the name and year system, give full journal titles and conform to the following styles:

Journals

Books

Chapter in book

Proceedings

Please list papers by more than two authors, but with the same first author, by year sequence and alphabetically within each year. Citation of all authors in the text should appear in the form: Thiery (2014) or (Thiery, 2014). Authors should be cited in chronological order as: (Jervis et al., 2009; Kranev & Walter, 2009).

Tables

Tables should be in a simple form and should not be used if a figure will adequately convey the same information. The table cannot be either submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript. Each table must have a clear and concise caption.

Illustrations

Illustrations should be submitted in TIFF or EPS format at 300 dpi, as separate files. Authors are encouraged to submit all figures in digital form. Electronic illustrations should be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript.

All manuscripts should be submitted via our on-line system, Editorial Manager, at http://www.editorialmanager.com/ber. New users will need to register first.

Publications

Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of the paper. Each author should also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

Copyright

Authors are supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the Bulletin and has not been previously published elsewhere.

Proofs

Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper Galerry cards are available for a fee and are the perfect business card. To order please contact Art and Design Services, journals.cambridge.org/ber.
