Molecular Nutrition

Statistical analysis of human microarray data shows that dietary intervention with n-3 fatty acids, flavonoids and resveratrol enriches for immune response and disease pathways

A. Warburton, O. Vasieva, P. Quinn, J. P. Stewart & J. P. Quinn 239-249

Effects of postprandial oral supplementation on anthropometric indices, glycemic control, blood pressure, lipid profile, insulin resistance and appetite in patients with type 2 diabetes: a randomized clinical trial

J. P. Stewart, D. Nicholas, W. Delaney & G. Safadi 250-258

Replacing carbohydrate during a glucose challenge with the egg white portion or whole eggs protects against postprandial impairments in vascular endothelial function in prediabetic men by limiting increases in glycemia and lipid peroxidation

Fetal DHA inadequacy and the impact on child neurodevelopment: a follow-up of a randomised trial of maternal DHA supplementation in pregnancy

K. A. Mulder, R. Elango & S. M. Innis 271-279

Dietary Surveys and Nutritional Epidemiology

Prevalence and determinants of vitamin D deficiency in the third trimester of pregnancy: a multicentre study in Switzerland

Prenatal vitamin D status and offspring’s growth, adiposity and metabolic health: a systematic review and meta-analysis
