Ageing and Society is an international journal devoted to publishing contributions to the understanding of human ageing, particularly from the social and behavioural sciences and humanities. Its interpretation of ageing is wide and includes all aspects of the human condition whether they relate to individuals, groups, institutions or societies.

In addition to original articles the journal also carries a review section comprising book reviews and shorter notes, review articles and symposia, and an abstracts service intended to draw readers' attention to relevant articles in other journals.
