## TO THOSE WHO **FOUGHT** A DIFFERENT KIND OF **BATTLE.**

More than 10,000 women served their country in Vietnam—most of them nurses who were fighting the battle to save lives. Now, through Stuart Pharmaceuticals' Project Memorial, you have an opportunity to join your colleagues in paying tribute to this special group of veterans.

What is Project Memorial? It's a program designed to support the efforts of a group called the Vietnam Women's Memorial Project. Their goal is to see the day-Veterans Day, 1988—when a statue of a woman is unveiled in its place of honor at the Vietnam Veterans Memorial. But if this goal is to be reached, over \$1 million needs to be raised.

### Responding to the call

Stuart, as serving corporate sponsor, has responded by making a substantial contribution to the project. But were doing even more: through Project Memorial, were making it easy for you to help, too.

For one full year—from November 1, 1987, to October 31, 1988—Stuart will make the following additional contributions:

☐ 10¢ each time your hospital purchases a unit of a HIBICLENS® liquid product

☐ 25¢ for each case of HIBICLENS® Sponge/Brushes your hospital purchases during three special deal periods

☐ 25¢ each time you return a Project Memorial entry card (your card also enters you into a drawing for \$15,000 in educational prizes)

So please join in the effort—your help is urgently needed if the statue is to be unveiled by the November '88 deadline. To get both the entry cards and complete details on Project Memorial, look for the posters and brochures on display at your hospital or contact your Stuart representative.

HIBICLENS. You know it's the leader in the fight against infection. But now it's also helping America's nurses win the recognition they deserve.
