Nutrition Research Reviews

Published on behalf of The Nutrition Society

Nutrition Research Reviews presents up-to-date, concise, critical reviews of key topics in nutritional science in order to advance new concepts and hypotheses. The journal encourages the exchange of fundamental ideas on nutritional well-being in both humans and animals.

Estimated dietary intakes of flavonols, flavanones and flavones in the European Prospective Investigation into Cancer and Nutrition (EPIC) 24 hour dietary recall cohort.

The British Journal of Nutrition is an international, peer-reviewed journal publishing original papers, review articles, short communications and technical notes on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. Correspondence is encouraged in a Nutrition Discussion Forum. The Journal recognizes the multidisciplinary nature of nutritional science and encourages the submission of material from all of the specialities involved in research and clinical practice. The Journal also publishes supplements on topics of particular interest.

The British Journal of Nutrition is published twice monthly by Cambridge University Press on behalf of The Nutrition Society. The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn. Tables of contents and abstracts are available free at the same website.

Editor-in-Chief
P C Calder, School of Medicine, University of Southampton, UK

Deputy Editors
F Bellido, INRA, University of Paris, Biobay, France
D R Jacobs Jr, School of Medicine and Health, University of Minnesota, Minneapolis, MN, USA
R J Wallace, Gut Health Programme, Rosset Institute of Nutrition and Health, University of Aberdeen, Aberdeen, UK
S J Whiting, College of Pharmacy and Nutrition, University of Saskatchewan, Saskatoon, Sask, Canada

Reviews Editors
D J Millward, Faculty of Health and Medical Sciences, University of Surrey, UK
P Aggett, School of Medicine and Health, Lancaster University, Lancaster, UK

Supplements Editor
J Woodside, Nutrition and Metabolism Group, Centre for Public Health, Queen's University, Belfast, UK

Editorial Board
J H Anderson, Chapel Hill, NC, USA
Y S Brar, Norwich, UK
J H Beattie, Aberdeen, UK
G Bell, Stirling, UK
M Blažič, Bevogob-Rebrovič, Slovenia
M Bix Pedersen, Longden, Denmark
G Baudige, Southhampton, UK
A E Buijnken, Dormont, Germany
J Bayne, Lecqen, Belgium
K D Cashman, Cork, Ireland
G C Burdge, Dortmund, Germany
A Esmaillzadeh, Isfahan, Iran
D McMurray, Aberdeen, UK
M A Esposito, Palermo, Italy
F E Ros, Rotterdam, Netherlands
S Fernandez-Viñolas, Madrid, Spain
S J Whiting, College of Pharmacy and Nutrition, University of Saskatchewan, Saskatoon, Sask, Canada

Systematic Reviews Editor
M Makrides, Women’s and Children’s Health Research Institute and University of Adelaide, Adelaide, Australia

Supplements
J Woodside, Nutrition and Metabolism Group, Centre for Public Health, Queen’s University, Belfast, UK

Publications Staff
C Goodstein (Publications Manager), C Jackson (Deputy Publications Manager), L Weeks, W Zaliwski and C T Hughes (Publications Officer) and S Shu and D Owen (Publications Assistant)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and applications for membership are available from The Nutrition Society, 10 Carrington Street, London W6 7NJ, UK. Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: office@nutsoc.org.uk

The Nutrition Society Home Page is at http://www.nutritionsociety.org

The British Journal of Nutrition is an international, peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. Prospective authors should note that they (or their institutions) now retain the copyright of their material published in The British Journal of Nutrition. As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the Directions to Contributors, which can be downloaded from the Nutrition Society website (http://www.nutritionsociety.org). Prospective authors may also contact the Publications Office directly on +44 (0)20 7602 6955 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a short title to help the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the ‘Licence to Publish’ (in case of copy right transfer). The Licence to Publish is available on the Nutrition Society website (http://www.nutritionsociety.org). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics except for was cited names. Standard abbreviations (e.g. Fig. and Table) and SI units should be used. Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required typescripts are given back for the opportunity to do this once only, the need for any further changes must at most reflect any minor issues.

Title Page. The first page should include a concise, informative title together with names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (including all containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an informative and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typecript. Text figures, line drawings, edited graphs and figures should be of sufficient size and quality to allow for reduction by half or two thirds. Halftone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Abstract. Each paper should commence with an informative and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typecript. Text figures, line drawings, edited graphs and figures should be of sufficient size and quality to allow for reduction by half or two thirds. Halftone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. When a paper has more than ten authors, only the names of the first three should be given followed by et al; give abbreviated journal titles and confirm to the following format:

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. ‘The conceptual difficulty of this approach has recently been highlighted (3–5).’ If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days by fax or express mail to the BJR Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjrproduction@cambridge.org.

Typescripts. The British Journal of Nutrition operates an on-line submission and review system (Adams). Authors should submit to the following address: http://bjn.msubmit.net/ If any difficulties are encountered please contact the Publications Office (details above) immediately.

British Journal of Nutrition, published by Cambridge University Press on behalf of the Nutrition Society 2011
Volume 106 No. 12 28 December 2011

Contents

Short Communication

Importance of early nutritional screening in patients with gastric cancer.
C. Gavazzi, S. Colatruglio, A. Sironi, V. Mazzaferro & R. Miceli
1773–1778

Molecular Nutrition

M-stem-activated protein kinase mediates the apoptosis of highly metastatic human non-small cell lung cancer cells induced by isothiocyanates.
H. Yan, Y. Zhu, B. Liu, H. Wu, Y. Li, X. Wu, Q. Zhou & K. Xu
1779–1791

Effect of anthocyanins on expression of matrix metalloproteinase-2 in naproxen-induced gastric ulcers.
S. J. Kim, Y. S. Park, H.-D. Park & H. I. Chang
1792–1801

Bone-protective effects of bioactive fractions and ingredients in Sambucus williamsii HANCE.
1802–1809

Supplement of bamboo extract lowers serum monocyte chemoattractant protein-1 concentration in mice fed a diet containing a high level of saturated fat.
J. K. Heij, W. Liu, M. J. Berry & J. Byrne
1810–1813

Hepatic expression of sodium-dependent vitamin C transporters: ontogeny, subcellular distribution and effect of chronic liver diseases.
1814–1825

Effect of the fat composition of a single high-fat meal on inflammatory markers in healthy young women.
M. C. W. Mylesst, I. Naarved, V. H. Telle-Hansen, T. Karhu, D. B. Lund, K.-H. Herzog,
M. Makinen, B. Halvorsen, K. Retterstøl, B. Kyrkkes, L. Granlund, R. B. Holen & S. M. Ulven
1826–1835

Metabolism and Metabolic Studies

Effects of dietary protein content and 2-hydroxy-4-methylthiobutanoic acid or DL-methionine supplementation on performance and oxidative status of broiler chickens.
Q. Swennen, P.-A. Geraert, Y. Mercier, N. Everaert, A. Stinckens, H. Willemsen, Y. Li,
E. Decuyper & J. Bayse
1845–1854

Tannic acid is more effective than clofibrate for the elevation of hepatic β-oxidation and the inhibition of 3-hydroxy-3-methyl-glutaryl-CoA reductase and aortic lesion formation in apo E-deficient mice.
1855–1863

Human and Clinical Nutrition

Digestive physiological outcomes related to polydextrose and soluble maize fibre consumption by healthy adult men.
B. M. V. Boler, M. C. R. Serao, L. L. Bauer, M. A. Staeger, T. W. Boileau, K. S. Swanson
1864–1871

Health effects of green tea catechins in overweight and obese men: a randomised controlled cross-over trial.
A. L. Brown, J. Lane, C. Hohnsiek, B. Nicoll, A. E. Meyers & T. Dodd
1880–1889

Structure modification of a milk protein-based model food affects postprandial intestinal peptide release and fullness in healthy young men.
K. R. Jukkola, L. J. Karhu, E. Vuori, E. F. Lilje, T. Karhu, A. Jurado-Acosta,
D. E. Lankinen, H. M. Mykkänen, K. S. Penttinen & K.-H. Herzog
1890–1898

Dietary Surveys and Nutritional Epidemiology

National Diet and Nutrition Survey: UK food consumption and nutrient intakes from the first year of the rolling programme and comparisons with previous surveys.
1899–1914

(Contents continued facing back cover)
