

## GENERAL NOTES

THE Editors are anxious to improve the clinical aspect of the Journal and would welcome more reports of interesting cases. These clinical records need not be at all elaborate and it would be unnecessary to go minutely into the ætiology or the literature of the subject. Senior Registrars have unique opportunities for seeing a large variety of cases, many with unusual features. It is in many ways regrettable that these should go unrecorded. It is hoped that all those in charge of clinics will help us in this matter and see that such cases are not overlooked.

### INTERNATIONAL CONGRESS ON THE MODERN EDUCATIONAL TREATMENT OF DEAFNESS

AN International Congress on the Modern Educational Treatment of Deafness will be held at the University of Manchester from July 15th-23rd, 1958.

The Congress is being organized with the approval and support of the Council of the University, with financial help from the Ministry of Education, the National College of Teachers of the Deaf, and the Rathbone Trustees, and with the co-operation of the British Council and the Alexander Graham Bell Association for the Deaf, Inc., Washington, D.C., U.S.A.

The Congress is being planned to bring together educators, otolaryngologists, pædiatricians, medical officers, audiologists and educational psychologists, to consider and discuss the significance, to the future development of their work, of the results of modern research on problems of deafness in childhood.

Arrangements are being made to offer accommodation to members of the Congress in University Halls of Residence. The cost of this type of accommodation is expected to be about £1 2s. per day, including bed, breakfast and dinner. The University Refectory will be available for meals during each day.

Forms of application for membership of the Congress will be supplied upon request, to Professor A. W. G. Ewing, Department of Education of the Deaf, the University, Manchester 13, England.

## POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness; more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides  $3\frac{1}{2}$  grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.
