ELECTRONIC MANUSCRIPTS
Authors should begin a sentence with a symbol or identifier name.

ILLUSTRATIONS
Supply these as EPS files as the publisher cannot original TEx files of illustrations. A handprint proof must be supplied for each illustration.

REFERENCES
Use American or British spelling as long as it is consistent within the paper.

PROOFREADING
Be sure to submit papers in their final form. Typographical and factual errors only may be changed at proof stage. The publisher reserves the right to change authors for reasons of change to their papers. No page change is due. The spelling policy of the journal is to follow author's own. Papers offprints may be purchased upon request.

COPYING
The journal is registered with the Copyright Clearance Center, Inc. 222 Rosewood Drive, Danvers, MA, 01923, USA. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to CCC of the per-copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 1568-4613/04 $16.00. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

Instructions to authors
Aims and scope
Theory and Practice of Logic Programming is an international journal that publishes refereed papers covering both the theory and the practice of logic programming. Among the topics covered are all applications that use logic programming, logic programming methodologies, specification, analysis and verification of systems, inductive logic programming, multi-related data mining, natural language processing, knowledge representation, nonmonotonic reasoning, semantic web reasoning, databases, implementations and architectures and constraint logic programming.

Instructions to authors
From a full of the published article will be supplied to first named author. Papers offprints may be purchased upon request.

InterNet access
The journal is included in the Cambridge Journals Online service which can be found at journals.cambridge.org. Refer also for other information to the dedicated journal web site at http://logicprogramming.org/
Contents

Regular papers
803 Truth versus information in logic programming
LEE NAISH AND HARALD SØNDERGAARD
841 A multi-engine approach to answer-set programming
MARCO MARATEA, LUCA PULINA AND FRANCESCO RICCA
869 The rise and fall of semantic rule updates based on SE-models
MARTIN SLOTA AND JOÃO LEITE
909 Infinite probability computation by cyclic explanation graphs
TAISUKE SATO AND PHILIPP MEYER
