GLOSAIR™ System H₂O₂ Technology: Dependable disinfection. Every time.

Inconsistencies in manual cleaning can leave your facility vulnerable to healthcare-associated infections (HAIs). The GLOSAIR™ System safely delivers powerful disinfection for the added protection hospital environments need. It's easy to operate and can be customized to meet your facility's specific disinfection goals.*

FORTHCOMING IN MAY

“*Disease Maps* is an extraordinary visual and narrative treat. I have come to look forward to Tom Koch’s books for the wonderful and unique way that he can synthesize data and present it visually and in the process tell us magnificent stories.”

Dr. Abraham Verghese,
Stanford University School of Medicine

“This is a masterful book in conception and structure. It is also extremely well written. What we find on reading is an exquisite telling of the history of the medical science of disease. The collection of medical maps, diagrams, and other illustrations is impressive in scope—there are many disease maps shown that have not been publicly available before or collected in one place.”

“An accessible and gripping narrative on a serious topic that manages to explain, in plain English, how viruses are changing the world.”—NATHAN WOLFE, founder and CEO of Global Viral Forecasting

A Planet of **Viruses**

CARL ZIMMER

“*A Planet of Viruses* is an important primer on the viruses living within and around all of us—sometimes funny, other times shocking, and always accessible. Whether discussing the common cold and flu, little-known viruses that attack bacteria or protect oceans, or the world’s viral future as seen through our encounters with HIV or SARS, Zimmer’s writing is lively, knowledgeable, and graced with poetic touches.”
