Great New Titles from Cambridge!

Unification Grammars

Nissim Francez,
Shuly Wintner

\$95.00: Hardback: 978-1-107-01417-6: 336 pp.

Neuromorphic and Brain-Based Robots

Jeffrey Krichmar,
Hiroaki Wagatsuma

\$110.00: Hardback: 978-0-521-76878-8: 368 pp.

Logical Dynamics of Information and Interaction

Johan van Benthem

\$95.00: Hardback: 978-0-521-76579-4: 384 pp.

Computational Logic and Human Thinking

How to be Artificially Intelligent

Robert Kowalski

\$110.00: Hardback: 978-0-521-19482-2: 336 pp.

\$46.00: Paperback: 978-0-521-12336-5

Understanding Sponsored Search

Core Elements of Keyword Advertising

Jim Jansen

\$99.00: Hardback: 978-1-107-01197-7: 304 pp.

\$37.99: Paperback: 978-1-107-62836-6

Basic Electronics for Scientists and Engineers

Dennis L. Eggleston

\$120.00: Hardback: 978-0-521-76970-9: 266 pp.

\$65.00: Paperback: 978-0-521-15430-7

Machine Ethics

Edited by Michael Anderson,
Susan Leigh Anderson

\$99.00: Hardback: 978-0-521-11235-2: 546 pp.

Prices subject to change.

Instructions for Contributors

Aims and Scope

Natural Language Engineering encourages original papers reporting research with a clear potential for practical application. The journal also invites surveys presenting the state of the art in important areas of Natural Language Engineering and Natural Language Processing as well as squibs discussing specific problems. Book reviews and reports on industrial applications are welcomed, as are conference reports, comparative discussions of Natural Language Engineering products and policy-orientated papers examining, for example, funding programmes or market opportunities. All contributions are peer reviewed.

General

Submission of a paper to *Natural Language Engineering* is held to imply that the contribution has not been previously published and is not being considered elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and will receive a copyright assignment form for signature on acceptance of their papers.

Electronic submissions are required. A pdf submission is preferred for review, but a separate copy of the abstract should be submitted in an editable format (Word, rtf or ASCII). Up to five keywords should also be supplied to help with assignment of reviewers. Papers should be preceded by an abstract of approximately 300 words.

All submissions from authors worldwide should preferably be emailed to the Executive Editor of the journal:

Prof. Ruslan Mitkov
Research Institute of Information and Language Processing
University of Wolverhampton, United Kingdom
email: R.Mitkov@wlv.ac.uk

with a copy to NLE@wlv.ac.uk

For detailed instructions on submitting files see: journals.cambridge.org/nle

Manuscript requirements

1. Manuscripts should be **double spaced throughout**, with wide margins. Sheets should be numbered consecutively.
2. The first page of the manuscript should give the title, the name(s) and full mailing address(es) of the author(s), together with e-mail address(es).

Conventions

Authors must consult the full list of conventions for *Natural Language Engineering* available in the Instructions for Contributors at journals.cambridge.org/NLE

First View publishing and DOIs

In order to make articles which have been accepted for publication in *Natural Language Engineering* available as quickly as possible, they are now published as First View online (at Cambridge Journals Online: journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI - Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published as First View on the web before they have appeared in a printed issue. See journals.cambridge.org/nle

Proofreading

Proofs will be supplied as pdfs to your nominated email address. These may be read and corrected by contributors provided that they can guarantee to return the corrected proofs within four days of receipt. Contributors should correct printers' errors but not introduce new or different material at this stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

No paper offprints are provided, but a pdf of the published article will be sent to the corresponding author.

NATURAL LANGUAGE ENGINEERING

Volume 17 Part 4 October 2011

CONTENTS

ARTICLES

- Machine learning for query formulation in question answering *page* 425
Christof Monz
- Dependency-based n-gram models for general purpose sentence realisation 455
Yuqing Guo, Haifeng Wang and Josef van Genabith
- BLANC: Implementing the Rand index for coreference evaluation 485
M. Recasens and E. Hovy
- Assessing user simulation for dialog systems using human judges
and automatic evaluation measures 511
Hua Ai and Diane Litman
- Learning opinions in user-generated web content 541
M. Sokolova and G. Lapalme

Printed in the United Kingdom by the University Press, Cambridge

The cover illustration is computer generated from an engraving of the Tower of Babel in an eighteenth-century bible
