

Complete Culture Media

IN TWO ENTIRELY NEW FORMS*

*** TABLETS**

— for preparation of single tubes and small quantities of media. Each tablet when dissolved in water produces a convenient quantity.

*** GRANULES**

— for larger scale preparations. Hard and of even size, the granules are less hygroscopic and easier to handle than spray-dried powder.

Both tablets and granules retain all the properties of the original medium, from which they are indistinguishable when reconstituted.

ADVANTAGES ARE APPARENT—

Big time-saving in preparation • No specialised equipment needed
Variability reduced to minimum • Easily portable for field work
Results reproducible from one laboratory to another when using media from central source • Economical, as only sufficient for immediate requirements need be used.

THE FOLLOWING ARE AMONG THE MEDIA AVAILABLE AS TABLETS AND GRANULES

Nutrient Broth • Nutrient Agar • McConkey Broth
McConkey Agar • Peptone Water • Glucose Peptone Broth
Glucose Peptone Agar • Agar-Agar

The Journal of Hygiene is issued four times a year.

Quotations can be given for back volumes on application.

Papers for publication should be sent to Professor E. T. C. SPOONER, London School of Hygiene and Tropical Medicine, Keppel Street, Gower Street, London, W.C. 1. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editor for publication are understood to be offered to *The Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive twenty copies of their papers free. Twenty-five additional copies may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £3. 15s. 0d. per volume (post-free), payable in advance; single numbers 20s. net. Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Enquiries from the U.S.A. should be addressed to the American Branch of the Press at 51 Madison Avenue, New York, 10.
