

Elias Ashmole 1617-1692

His Autobiographical Notes, his Correspondence and Other Contemporary Sources Relating to His Life and Work

Edited with a Biographical Introduction by C. H. JOSTEN

This edition, and the biography of the founder of the Ashmolean Museum and founder-member of the Royal Society which introduces it, throws light on many little-known seventeenth-century by-ways. *26 plates, 5 volumes £18 18s net*

The Life of William Harvey

SIR GEOFFREY KEYNES

'It is by far the best biography of the discoverer of the circulation of the blood. It will be a classic.' *The Lancet Coloured frontispiece, 35 plates, 1 map 90s net*

The Six-Cornered Snowflake

JOHANNES KEPLER

Translated by C. HARDIE

'... elegant edition ... Mr C. Hardie's translation and notes are impeccable.' *The Times Literary Supplement 2 plates, 6 text figures 21s net*

The Background to Newton's 'Principia'

A Study of Newton's Dynamical Researches in the Years 1664-84

JOHN HERIVEL

'... this long-awaited study will almost certainly become a classic in the field.' *Endeavour 5 plates 70s net*

Atomism in England from Harriot to Newton

ROBERT HUGH KARGON

The author traces the history of the introduction and spread of the atomic doctrine as a case study of the problems of the establishment of the new learning and its methodology. *42s net*

The Measure of the Universe

A History of Modern Cosmology

J. D. NORTH

'... a most illuminating and enjoyable introduction to the subject, with a minimum of mathematics and no demand for previous technical knowledge on the part of the reader.' *Endeavour 70s net*

Theophrastus: De Lapidibus

Edited with Introduction, Translation and Commentary by D. E. EICHOLZ

'... a copy of this scholarly work by Eicholz should be in every important library of the works of classical authors.' *The Classical Journal 4 text figures 45s net*

Intellectual Origins of the English Revolution

CHRISTOPHER HILL

'... he is a "must" for anyone curious about what lay behind the *crise de conscience*, as he calls it, of the early seventeenth century.' *The Times 45s net*

PRESS

John Dalton and the Atom

FRANK GREENAWAY

This important study of Dalton has been produced to mark the bi-centenary of his birth. It describes the development of the atomic theory which in Dalton's hands became the basis for the great advances in chemistry; it also throws light on one of the greatest but least-known figures in British scientific history.

'... a very good little book, written with great lucidity and charm, in excellent prose which reflects precisely the intricate balance of ideas that Mr Greenaway presents . . . I hope that this book will be widely read.'—*Yorkshire Post*

'... a pleasure to read.'—*The Sunday Times*

The Society of Arcueil:

**A view of French
science at the time
of Napoleon I**

M. P. CROSLAND

The members of the Society of Arcueil were amongst the most prominent figures in the scientific world of the early nineteenth century. Dr Crosland's study describes not only their lives and work but the conditions and organization of science under Bonaparte who made his own contribution through encouragement and patronage to this great period of scientific activity in France.

HEINEMANN EDUCATIONAL BOOKS

48 CHARLES STREET LONDON W1

Now Available

THE SOURCES OF SCIENCE

Under the general editorship of Harry Woolf, Willis K. Shepard Professor of the History of Science, The Johns Hopkins University. Its purpose is to make available to the modern reader the key works of science in scholarly, annotated and, when warranted, translated editions.

First Lines of Physiology

[32] by ALBRECHT VON HALLER

A Reprint of the 1786 Edition, with a new introduction by Lester S. King, M.D. *2 vols. in 1, cloth \$22.50/£8 1s. 6d.*

The Works of William Harvey, M.D.

[13] Translated from the Latin, with a Life of the Author, by Robert Willis. London 1847. *cloth \$25.00/£9 0s. 0d.*

The Earthly Venus

[29] by PIERRE-LOUIS MOREAU DE MAUPERTUIS

Translated from *Vénus Physique* by Simone Brangier Boas. With notes and introduction by George Boas, Professor Emeritus of the History of Philosophy, The Johns Hopkins University. *cloth \$8.50/£3 1s. 6d.*

Die Aetiologie, der Begriff und die Prophylaxis der Kindbettfiebers

[19] von IGNAZ PHILIPP SEMMELWEIS

Reprinted from the 1861 edition. With a new introduction by Dr. Alan F. Guttmacher, President of Planned Parenthood—World Population. *cloth \$12.00/£4 6s. 0d.*

CAMBRIDGE

Engineering at Cambridge University 1783-1965

T. J. N. HILKEN

Engineering began at Cambridge as a subject of interest to certain professors during the Industrial Revolution. Captain Hilken tells how it gradually became an accepted part of liberal education and later a discipline in its own right. He indicates the particular contribution which the university has made and is making to the development of higher technology in Great Britain.

Those interested in the development of technological education will find this book of more than local interest. 45s. net

CAMBRIDGE UNIVERSITY PRESS

DAVID & CHARLES

were founded in 1960 as specialists in transport and industrial history. They have expanded rapidly, with an increasing range of definitive non-fiction, heavy emphasis being placed on original research, good perspective and details such as illustrations and indexes.

**The Journal of the History of
Industry and Technology**

Edited by Kenneth Hudson

Published quarterly, annual subscription 42s. 1966 bound volume 50s.

**DAVID & CHARLES
NEWTON ABBOT**

THE ELEMENTS RAGE The Extremes of Natural Violence

FRANK W. LANE

'The book contains a wealth of fascinating anecdotes and historical material.'—*New Scientist*
280 pages, plus 48 pages of plates. 50s.

TECHNIQUES OF INDUSTRIAL ARCHAEOLOGY

J. P. M. PANNELL

'Mr Pannell deals most adequately with the source material of industrial archaeology.'—*Times Educational Supplement*. 192 pages, plus 8 pages of plates. 35s.

THE BRITISH IRON & STEEL INDUSTRY: A Technical History

W. K. V. GALE

'It is concise and splendid, and the subject topical.'—*The Listener*. 200 pages and 16 pages of plates. 35s.

Cass Library of Science Classics

A series of facsimile editions of rare masterpieces of the history and philosophy of science from the Scientific Revolution to modern times.

General Editor: Dr. L. L. Laudan, University College, London.

Titles to be published in 1967

- Charles Babbage** Ninth Bridgewater Treatise—A Fragment (2nd ed., 1838). 90s.
- Isaac Barrow** The Usefulness of Mathematical Learning (1734). Translated by John Kirkby. With a new introduction by M. S. Mahoney. 5 gns
- Torbern Bergman** A Dissertation on Elective Attractions (1785). Translated by T. Beddoes. With a new introduction by A. M. Duncan. 5 gns
- Abraham DeMoivre** The Doctrine of Chances: or, A Method of Calculating the Probabilities of Events in Play (2nd revised ed., 1738). 5 gns
- James Edleston, Ed.** Correspondence of Sir Isaac Newton and Professor Cotes, including Letters of Other Eminent Men (1850). 5 gns
- Johann von Goethe** Theory of Colours (1840). Translated by Charles Eastlake. 6 gns
- Robert Hooke** Philosophical Experiments and Observations (1726). Edited by W. Derham. 90s.
Posthumous Works (1705). Edited by Richard Waller
With a new introduction by T. M. Brown. 12 gns
- Christiaan Huygens** The Celestial Worlds Discover'd (1698). 45s.
- Richard Kirwan** An Essay on Phlogiston, and the Constitution of Acids (1789). 90s.
- Antoine Lavoisier** Essays, Physical and Chemical (1776). Translated by T. Henry. With a new introduction by Professor D. McKie. 7 gns
- J. Clerk Maxwell, Ed.** The Electrical Researches of the Honourable Henry Cavendish, F.R.S. (1879). 6 gns
- Voltaire** The Elements of Sir Isaac Newton's Philosophy (1738). Translated by John Hanna. 90s.
- William Whewell** Philosophy of the Inductive Sciences (1847)
2 volumes. 12 gns
History of the Inductive Sciences (1857)
3 volumes. 15 gns
- John Wilkins** Mathematical and Philosophical Works (1802).
2 volumes in one. 7 gns
-

Science in Nineteenth- Century America

Edited by
Nathan Reingold

'Many of the letters appear in print for the first time; and since they constitute the exciting raw material from which history must be constructed the book has a fascination which is obscured by its uninformative title.

Ranging from the invitation to Benjamin Silliman—newly graduated in law—to take up a professorship in science at Yale College in 1801 to the valedictory address of Henry Rowland to the American Physical Society the book spans the whole century. Such correspondence, despite its fragmentary nature, illuminates far more effectively than any coherent history the ragged nature of scientific advance.

The book will appeal to a varied readership at many levels of scholarship. Those who are especially interested in the development of American science will find it an invaluable source of material, but it also contains revealing comments on science in Europe.'

MICHAEL FARADAY Centenary Year

MICHAEL FARADAY

L. Pearce Williams

For this remarkable biography L. Pearce Williams won the Pfizer Award for the best book on the history of science published in 1965.

'Professor Pearce Williams' book, illustrated with a number of excellent portraits, will stand as the authoritative biography of Faraday.'

Sir Harold Hartley, *New Scientist* 70s

CHAPMAN & HALL

THE NEWCOMEN SOCIETY FOR THE STUDY OF THE HISTORY OF ENGINEERING AND TECHNOLOGY

Meetings held monthly from October to April. Summer Meeting of four to five days' duration. One-day meetings in the South-East and Midlands.

Transactions, issued annually, contains seven or eight Papers. (A typical volume contained 187 pages, 40 text figures and 51 half-tone illustrations.)

Bulletin of 12 pages issued three times a year.

Subscription: £4 (£2 without *Transactions*).

Apply for particulars of membership to the Hon. Secretary, Newcomen Society, Science Museum, London, S.W.7.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Programme 1967-1968

The following lectures have been arranged:

- October 23rd 1967 J. D. NORTH, *Eclipses and Eclipse Computers in the Ptolemaic Tradition.*
- November 20th 1967 F. I. G. RAWLINGS, *Physical Chemistry and Chemical Physics: A History of Two Movements.*

The WINTER MEETING of the Society will be held in London on January 5th 1968, and will consist of lectures and short papers from members.

Arrangements are in hand for the organisation of the SUMMER MEETING, 1968, at Leeds University during the first week of July.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

THE objects of the Society are to further the study of the history of science, by holding meetings for the reading and discussion of papers, and by facilitating the publication of relevant material.

The British Journal for the History of Science is the official organ of the Society.

Meetings are held in the Science Museum, Exhibition Road, South Kensington, London, S.W.7, usually in October, November, March and May. In addition a Winter Meeting is held in January and a Summer Meeting in June; neither of these meetings is necessarily held in London.

Membership is open to all persons approved by the Council of the Society, and elected at an Ordinary Meeting. The annual subscription is at present £2 10s. (for Students £1 10s.) and includes a free issue of the Society's Journal, which appears in June and December each year.

Those who wish to join the Society should write to the *Hon. Secretary*, Mr. J. A. Chaldecott, Science Museum, South Kensington, London, S.W.7.

Papers for inclusion in the Journal should be submitted to the *Hon. Editor*, Dr. M. P. Crosland, Department of Philosophy, The University, Leeds 2, from whom instructions may be obtained concerning the presentation and documentation of papers. All communications on editorial matters, and books for review, should be addressed to the Hon. Editor.

Particulars regarding advertising in the Journal may be obtained from the *Hon. Treasurer*, Mr. D. Chilton, Science Museum, South Kensington, London, S.W.7.

The British Journal for the History of Science is published by the Society. Four parts constitute one Volume; each part contains approximately 96 pages. The cover of each issue has a consecutive number for ease of collation in subsequent binding, e.g. No. 16 will be numbered: Vol. iv Part iv No. 16, and No. 17 will be: Vol. v Part i No. 17.

Order Forms, with lists of contents of Parts already published, are obtainable from the *Hon. Publications Secretary*, Dr. J. D. North, 39 Wellington Square, Oxford, to whom Orders for the Journal should be sent.

Whole Cloth Binding Cases lettered in Gold on spine and particulars of binding costs may be obtained from HEADLEY BROTHERS LTD., INVICTA PRESS, ASHFORD, KENT.
