

Submission Deadline—March 1, 2016

CALL FOR PAPERS

Reinventing Boron Chemistry and Materials for the 21st Century

Boron-based compounds are an ideal platform for developing new technologies due to their thermal and chemical stability, mechanical strength, and electrical and magnetic properties. Boron's capability to adopt a wide range of bonding configurations facilitates the creation of structurally-rich compounds with diverse electrical and mechanical properties. This Focus Issue of the *Journal of Materials Research* will highlight exciting recent developments in understanding, designing, and preparing boron-containing materials.

A multitude of potential applications exists for these compounds, including coatings for thermal and wear protection, high-field permanent magnets, grinding media, thermoelectric devices, neutron detectors, and superconductors. To advance these engineering applications, a fundamental understanding of how composition and microstructure can be used to control physical properties is needed, in addition to accessible processing methods with which to reliably produce these materials.

The editors encourage contributed papers concerned broadly with boron-based materials research. Both fundamental and applied subjects are welcome.

Potential topics of interest include, but are not limited to, the following areas:

- ◆ Processing methods for engineering microstructure and grain boundaries
- ◆ Theoretical modeling and design of boride compounds
- ◆ Development of boron-based electronics for sensors
- ◆ Novel routes for synthesizing boron compounds
- ◆ Boron-containing magnetic materials
- ◆ Methods for the preparation of boride nanomaterials
- ◆ Boron-based materials for ultra high temperature, oxidative, and corrosive environments
- ◆ New boride compositions, phases, and polymorphs
- ◆ Boron materials for energy storage and generation
- ◆ Engineering boron surfaces
- ◆ Properties related to ionic transport and storage

GUEST EDITORS

Scott P. Beckman, Washington State University, USA

Bill Fahrenholtz, Missouri University of Science and Technology, USA

Tina T. Salguero, The University of Georgia, USA

Eric Wuchina, Office of Naval Research, USA

MANUSCRIPT SUBMISSION

To be considered for this issue, new and previously unpublished results significant to the development of this field should be presented. The manuscripts must be submitted via the *JMR* electronic submission system by **March 1, 2016**. Manuscripts submitted after this deadline will not be considered for the issue due to time constraints on the review process. **Submission instructions may be found at www.mrs.org/jmr-instructions.** Please select “Focus issue: Reinventing Boron Chemistry and Materials for the 21st Century” as the manuscript type. **Note our manuscript submission minimum length of 6,000 words.** All manuscripts will be reviewed in a normal but expedited fashion. Papers submitted by the deadline and subsequently accepted will be published in the Focus Issue. Other manuscripts that are acceptable but cannot be included in the issue will be scheduled for publication in a subsequent issue of *JMR*.

MATERIALS RESEARCH

CALL FOR NOMINATIONS Paper of the Year Award

The **JMR** Paper of the Year Award recognizes excellence in advancing materials knowledge through written scholarship. Nominations are open to papers published in **JMR** in the 2015 volume year.

Nominate a Colleague Today!

Nomination Deadline: January 22, 2016

Visit www.mrs.org/jmr-award for additional information and nomination requirements.

CONGRATULATIONS

to last year's
winners of the
first annual
JMR Paper of
the Year Award

Nobuto Oka and Saori Yamada,
Aoyama Gakuin University

Takashi Yagi and Naoyuki Taketoshi,
National Metrology Institute of Japan

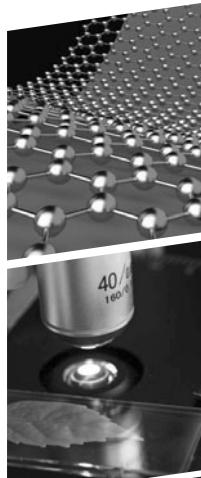

Junjun Jia and Yuzo Shigesato,
Aoyama Gakuin University

for "Thermophysical properties of SnO_2 -based transparent conductive films: Effect of dopant species and structure compared with $\text{In}_2\text{O}_3\text{-ZnO}$, and TiO_2 -based films"

Published August 14, 2014—**JMR** volume 29, issue 15

MRS PUBLISHING

Have an idea for a new book or journal on a materials-related topic? Is there a materials topic that is underrepresented, or shows exceptional potential for growth within the MRS publications portfolio? If so, submit a proposal to the Materials Research Society.

The MRS/Cambridge University Press publishing partnership will provide you with prompt, professional, sustained and enthusiastic support throughout the publication process—from concept to distribution.

1ST YEAR IN
PHOENIX

2016 MRS® SPRING MEETING & EXHIBIT
March 28–April 1, 2016 | Phoenix, Arizona

Registration Opens Mid-January | www.mrs.org/spring2016

2016 MRS SPRING MEETING SYMPOSIA

CHARACTERIZATION AND MODELING OF MATERIALS

- CM1 New Frontiers in Aberration Corrected Transmission Electron Microscopy
- CM2 Quantitative Tomography for Materials Research
- CM3 Mechanics and Tribology at the Nanoscale—*In Situ* and *In Silico* Investigations
- CM4 Verification, Validation and Uncertainty Quantification in Multiscale Materials Simulation

ENERGY AND ENVIRONMENT

- EE1 Emerging Materials and Phenomena for Solar Energy Conversion
- EE2 Advancements in Solar Fuels Generation—Materials, Devices and Systems
- EE3 Materials and Devices for Full Spectrum Solar Energy Harvesting
- EE4 Electrode Materials and Electrolytes for Lithium and Sodium Ion Batteries
- EE5 Next-Generation Electrical Energy Storage Chemistries
- EE6 Research Frontiers on Liquid-Solid Interfaces in Electrochemical Energy Storage and Conversion Systems
- EE7 Mechanics of Energy Storage and Conversion—Batteries, Thermoelectrics and Fuel Cells
- EE8 Grid-Scale Energy Storage
- EE9 Hydrogen and Fuel Cell Technologies for Transportation—Materials, Systems and Infrastructure
- EE10 Recent Advances in Materials for Carbon Capture
- EE11 Caloric Materials for Renewable Energy Applications
- EE12 Radiation Damage in Materials—A Grand Multiscale Challenge
- EE13 Actinides—Fundamental Science, Applications and Technology
- EE14 Titanium Oxides—From Fundamental Understanding to Applications
- EE15 Materials for Sustainable Development—Integrated Approaches

ELECTRONICS AND PHOTONICS

- EP1 Organic Excitonic Systems and Devices
- EP2 Silicon Carbide—Substrates, Epitaxy, Devices, Circuits and Graphene
- EP3 Perovskite-Based Photovoltaics and Optoelectronic Devices
- EP4 Emerging Silicon Science and Technology
- EP5 Metal Oxide Hetero-Interfaces in Hybrid Electronic Platforms
- EP6 Integration of Heterovalent Semiconductors and Devices
- EP7 Material and Device Frontiers for Integrated Photonics
- EP8 Resonant Optics—Fundamentals and Applications
- EP9 Materials and Processes for Nonlinear Optics
- EP10 Optoelectronic Devices of Two-Dimensional (2D) Materials
- EP11 Novel Materials for End-of-Roadmap Devices in Logic, Power and Memory
- EP12 Materials Frontiers in Semiconductor Advanced Packaging
- EP13 Tailoring Superconductors—Materials and Devices from Basic Science to Applications
- EP14 Materials for Next-Generation Displays
- EP15 Diamond Power Electronic Devices

MATERIALS DESIGN

- MD1 Materials, Interfaces and Devices by Design
- MD2 Tuning Properties by Elastic Strain Engineering—From Modeling to Making and Measuring
- MD3 Functional Oxide Heterostructures by Design
- MD4 Phase-Change Materials and Applications
- MD5 Fundamentals of Organic Semiconductors—Synthesis, Morphology, Devices and Theory
- MD6 Electronic Textiles
- MD7 Advances in Lanthanide Materials for Imaging, Sensing, Optoelectronics and Recovery/Recycling
- MD8 Multiscale Behavior of Materials in Extreme Environments
- MD9 Magnetic Materials—From Fundamentals to Applications
- MD10 Micro-Assembly Technologies

NANOTECHNOLOGY

- NT1 Functional Nanostructures and Metamaterials for Solar Energy and Novel Optical Phenomena
- NT2 Oxide and Chalcogenide-Based Thin Films and Nanostructures for Electronics and Energy Applications
- NT3 Carbon Nanofluidics
- NT4 Emerging Non-Graphene 2D Materials
- NT5 Nanodiamonds—Fundamentals and Applications
- NT6 Colloidal Nanoparticles—From Synthesis to Applications
- NT7 Nanoparticle Characterization and Removal
- NT8 Silicon Nanostructures—Doping, Interface Effects and Sensing

SOFT MATERIALS AND BIOMATERIALS

- SM1 Liquid Crystalline Materials—Displays and Beyond
- SM2 Bioinspired Dynamic Materials—Synthesis, Engineering and Applications
- SM3 Soft Materials for Compliant and Bioinspired Electronics
- SM4 Engineering Biointerfaces with Nanomaterials
- SM5 Surfaces and Interfaces for Biomaterials
- SM6 Transient and Biologically-Inspired Electronics
- SM7 Future Healthcare Needs through Biomaterials, Bioengineering and the Cellular Building Block
- SM8 Bioinspired Metal Nanoparticles—Synthesis, Properties and Application
- SM9 Structure and Properties of Biological Materials and Bioinspired Designs
- SM10 Biofabrication-Based Biomaterials and Tissues

Presented by
MRS Bulletin

Atom Probe Tomography (APT) and Applications in Materials Science

Wednesday, January 20 | 12:00 pm – 1:30 pm (ET)

Atom probe tomography (APT) has emerged as an important analytical technique and an ultimate characterization technique for surface science, especially for obtaining atomistic structure and chemical composition information at nanometer and atomistic length scales. The January 2016 issue of *MRS Bulletin* focuses on the applications of APT and how these are leading to new insights in materials research. This webinar will expand on the topics explored in the articles in this issue of *MRS Bulletin*.

- **Attendance for this and all MRS OnDemand Webinars is FREE, but advance registration is required.**

Visit www.mrs.org/webinars today for more information.

JOIN US ON WEBINAR WEDNESDAYS IN 2016!

- January 20** Atom Probe Tomography (APT) and Applications in Materials Science
- February 24** Beyond Conventional Lithography: Patterning via Self-organization and Self-folding
- March 23** Metamorphic Epitaxial Materials
- April 20** Twinning in Metallic Materials: Strengthening and Plasticity
- May 25** Nucleation in Atomic, Molecular and Colloidal Systems
- June 22** Frontiers of Synchrotron Diffraction Research in Materials Science
- July 20** Advanced Tomography Techniques for Biological, Organic and Inorganic Materials
- August 24** Microstructure Informatics in Materials and Process Design
- September 21** Hierarchical Materials
- October 26** Metallic Materials for 3D Printing

SPONSORSHIP OPPORTUNITIES

The MRS OnDemand Webinar Series features free, live monthly Webinars and event re-broadcasts that provide valuable educational information on timely, interdisciplinary topics. This design format provides a great opportunity to learn while networking with other researchers from around the world.

Create your own Webinar using the content and speakers of your choice, or sponsor an existing event from our Webinar Calendar.

Benefits Include:

- Reaching new customers by providing an educational resource to targeted audiences
- Benefiting from MRS OnDemand Webinar Series marketing—print and online advertising; targeted email marketing; inclusion in the *Materials360®* e-newsletter; and social media
- Generating quality leads using the detailed registration information provided by each of the registrants
- Gaining long-term exposure—your Webinar lives on long after the broadcast with library archiving

Visit www.mrs.org/webinars for more details and proposal form or contact Mary E. Kaufold at kaufold@mrs.org | 724-779-2755.

VIEW PAST WEBINARS IN THE SERIES

Past Webinars are archived and available to watch OnDemand at www.mrs.org/webinars.

About the Materials Research Society

The Materials Research Society (MRS®) is a not-for-profit scientific association founded in 1973 to promote interdisciplinary goal-oriented basic research on materials of technological importance. Membership in the Society includes over 16,000 scientists from industrial, government, and university research laboratories in the United States and abroad.

The Society's interdisciplinary approach to the exchange of technical information is qualitatively different from that provided by single-discipline professional societies because it promotes technical exchange across the various fields of science affecting materials development. MRS sponsors two major international annual meetings encompassing many topical symposia, as well as numerous single-topic scientific meetings each year. It recognizes professional and technical excellence, conducts tutorials, and fosters technical exchange in various local geographical regions through Section activities and Student Chapters on university campuses.

MRS publishes symposia proceedings, the *MRS Bulletin*, and other volumes on current scientific developments. The *Journal of Materials Research*, the archival journal spanning fundamental developments in materials science, is published twenty-four times a year by Cambridge University Press for the MRS. *MRS Communications* is a full-color letters and prospectives journal focused on groundbreaking work across the spectrum of materials research. *MRS Energy & Sustainability—A Review Journal* publishes reviews on key topics in materials research and development as they relate to energy and sustainability.

MRS regular and student members may subscribe to *Journal of Materials Research*. See inside front cover for subscription rates for *Journal of Materials Research*.

MRS is an Affiliated Society of the American Institute of Physics and participates in the international arena of materials research through associations with professional organizations.

For further information on the Society's activities, contact MRS Headquarters, 506 Keystone Drive, Warrendale, PA 15086-7573; telephone (724) 779-3003; fax (724) 779-8313.
