

**1991 MEETING OF THE AMERICAN SOCIETY OF ZOOLOGISTS**  
with the  
**AMERICAN MICROSCOPICAL SOCIETY, ANIMAL BEHAVIOR SOCIETY**  
**THE CRUSTACEAN SOCIETY,**  
**AND THE INTERNATIONAL ASSOCIATION OF ASTACOLOGY**

Hyatt Regency  
Atlanta, Georgia  
December 27-30

Housing Rates  
\$72/room for single  
or double rooms

Call for Papers: April 1991  
**Abstract Deadline: August 1, 1991**  
For Poster or Oral Papers

**ASZ DIVISIONAL SYMPOSIA**

- Basic Animal Behavior Research in Zoos: A Link with the Wild
- Hormonal Control of Growth and Reproduction in Arthropods
- Natural and Adaptive Immune Mechanisms in Insects
- Neuropeptides: Synthesis, Release, Action, and Evolution
- Current Perspectives on the Evolution, Ecology, and Comparative Physiology of Bimodal Breathing
- Development and Evolution of the Vertebrate Head
- Libbie Henrietta Hyman: Life and Contributions
- Reproduction, Larval Biology and Recruitment in the Deep-Sea Benthos
- Scorpions as Model Biological Systems
- Comparative Anatomy of the Branchial and Hypobranchial Nerves:  
New Data from Adults and Embryos
- Long-Term Dynamics of Coral Reefs

**SOCIETY-SPONSORED SYMPOSIA**

- Strategies for Analyzing Neuropeptide Systems (ASZ)
- The Biology of Flatworms (AMS)

\*\*\*\*\*

Meeting Hosted by Agnes Scott College and Emory University.  
John F. Pilger and Darrell R. Stokes, Co-Chairpersons of the Local Committee

For more information, contact:

Phone: (805) 492-3585  
Fax: (805) 492-0370

*A new international journal presenting important  
new information on our climate*

# CLIMATE RESEARCH

Interactions of Climate with Organisms,  
Ecosystems, and Human Societies

---

Climate is a major determinant in the evolution and manifestation of life. Modern human societies have become capable of changing the global climate. The investigation of climate dynamics, and the assessment and control of human impacts, are among the greatest challenges facing present and future generations.

CLIMATE RESEARCH evaluates, selects and disseminates important new information in these vital research areas. Founded by Professor Otto Kinne – creator of other leading international journals – CLIMATE RESEARCH is edited by a team of world-wide acknowledged experts and published by Inter-Research. Editors, Editorial Advisors and publisher are committed to achieving the highest possible scientific and technical standards.

---

**Coverage:** Basic and applied research devoted to all aspects of climate – present, past and future; effects of human societies and organisms on climate; effects of climate on our ecosystem. In particular, CLIMATE RESEARCH invites papers concerned with:

- Interactions of climate with organisms, populations, ecosystems, and human societies.
- Short- and long-term changes in climatic elements: humidity and precipitation, temperature, wind velocity and storms, radiation, carbon dioxide, trace gases, ozone, UV-radiation.
- Methodological aspects of model development and application.
- Climate effects on biotic diversity. Species extinction.
- Historical case studies (paleoecology, paleoclimatology).
- Analyses of extreme climatic events, their physico-chemical properties and their time-space dynamics. Climatic hazards.
- Land-surface climatology. Soil degradation, deforestation, desertification

Focal points of applied research are: climate effects on agriculture, forestry, fisheries and aquaculture; surface and groundwater quality and supply; pests and pest control; urbanization and economic developments; environmental protection; human health.

---

## Subscription Information

Vol. 1 (3 issues) is scheduled to be published in 1990/91. Annual rate: DM 285 including postage, handling and insurance. Air mail costs are available upon request.

Publisher: Inter-Research, PO Box 1120, W-2124 Amelinghausen, Germany; Tel. (041 32) 7 27;  
Fax (041 32) 88 83

# Oceanus

"For anyone who loves the sea and whatever moves upon it, Oceanus seems to me a 'must'. It is written for the layman, but its articles carry the authority of that great research institute at Woods Hole."

SCIENCE EDITOR, NEW YORK TIMES

Published quarterly by the Woods Hole Oceanographic Institute, *Oceanus* explores a wide range of issues related to the world's oceans. It contains original research reports by the world's leading marine scientists, all edited for the educated lay reader. The journal is rich with full colour and deep-sea photography, clearly illustrated articles and comprehensive diagrams. With its reputable editorial board and original research reports, *Oceanus* is undoubtedly the most comprehensive journal of its kind available.

Many issues are thematic, explaining the nature and purpose of current marine research in many related disciplines. Topics covered in recent issues include: Changing Climates and the Oceans; Japan and the Sea; The Galapagos Marine Resources; The Antarctic; Whales; The Oceans and Global Warming; The Mediterranean; Ocean Disposal; Marine Education; and Naval Oceanography.

## Special Offer

Subscribe to *Oceanus* and order back volumes at 25% discount! For details about this offer, please complete the coupon and return to Cambridge University Press at the address shown.

## Subscription

Volume 34, 1991 published quarterly in March, June, September and December: £24 for individuals; £43 for institutions; £15 for students; airmail £14 per year extra

ISSN 0029-8182

 Cambridge  
Journals

## Order Form

- Please enter my subscription to *Oceanus* Volume 34, 1991 @
- £24 for individuals;  £43 for institutions;  £15 for students;
- £14 per year extra for airmail
- I enclose a cheque (made payable to Cambridge University Press and drawn against a UK bank)
- Please invoice me
- Please send me details about your special offer on back volumes of *Oceanus*
- Please send me a free sample copy
