The following papers have been accepted for publication and will appear shortly:

SCHEUER, P. A. G. A statistical method for analysing observations of faint radio stars.

SIMONS, S. The absorption of very high frequency sound in dielectric solids.

GRÜNBAUM, B. A simple proof of Borsuk's conjecture in three dimensions.

BHATTACHARYA, P. B. The Hilbert function of two ideals.

BASSALI, W. A. The transverse flexure of thin elastic plates supported at several points.

BARNETT, I. A. and ABIAN, S. Some properties of skew-symmetric elements of a ring.

BAUMSLAG, GILBERT. A theorem on infinite groups.

Fox, Charles. Some applications of Mellin transforms to the theory of bivariate statistical distributions.

JONES, D. S. and Whitham, G. B. An approximate treatment of high frequency scattering.

AFRIAT, S. N. Orthogonal and oblique projectors and the characteristics of pairs of vector spaces.

Broadbent, S. R. and Hammersley, J. M. Percolation processes. I. Crystals and mazes.

Hammersley, J. M. Percolation processes. II. The connective constant.

Coles, W. J. On a theorem of van der Corput on uniform distribution.

RINGROSE, J. R. Precompact linear operators in locally convex spaces.

Lowig, H. F. J. On the existence of freely generated algebras.
