AIDS FOR THE DEAF

HAWKSLEY'S AURICLES

The best non-electric aid for slight and moderate degrees of deafness and specially suitable when the patient is suffering from Tinnitus.

For Extreme Cases—

HAWKSLEY'S "GREEN STRIPE"
CONVERSATION TUBES

are very much more powerful and reliable than any electrical aid.

IMPORTANT NOTICE

to the Medical Profession and their Patients

We are the originators of a

10 DAYS' FREE HOME TRIAL,
without obligation to purchase, of any of our Acoustic Aids, and, in our opinion, this is the only fair and satisfactory method of selling such instruments to the public. We daily hear most distressing tales from deaf people who have been coerced into purchasing expensive aids without a proper home trial.

T. HAWKSLEY, LTD.
(ESTABLISHED 1869)

351 OXFORD STREET, LONDON, W.1
Telephone: Mayfair 1182

SOLE AGENTS FOR THE MARCONI OTOPHONE

Our full range of illustrated lists sent on application

Downloaded from https://www.cambridge.org/core. IP address: 54.191.40.80, on 10 Sep 2017 at 04:58:32, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/S0022215100034241
ORAL HYGIENE

Odol & Bacteria

Odol by virtue of its unique antiseptic agents may claim to be the most efficient means of ridding the oral cavity of pathogenic bacteria.

ODOL EXERTS
MAXIMUM INHIBITORY POWER
AGAINST BACTERIA
BUT HAS
MINIMUM ACTION ON BODY TISSUES

The following table indicates the effect of ODOL in the mouth:

<table>
<thead>
<tr>
<th>Rate of development of bacteria in unclean mouth, Index 100 bacteria.</th>
<th>Rate of development of bacteria in mouth cleansed with Liquid Odol, Index—100 bacteria.</th>
</tr>
</thead>
<tbody>
<tr>
<td>150 in 1/4 hr</td>
<td>200 in 1/2 hr</td>
</tr>
<tr>
<td>32 in 1/2 hr</td>
<td>40 in 1 hr</td>
</tr>
</tbody>
</table>

You will find ODOL Tooth Paste powerfully antiseptic. It is absolutely non-caustic, and whitens the teeth without in any way harming the enamel.

Samples and Literature will gladly be sent to members of the Profession on application to

CRANBUX LIMITED OF NORWICH
Sole Manufacturers and Distributors of British Odol Products
CHEVALIER JACKSON'S INSTRUMENTS FOR OESOPHAGOSCOPY,
LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson’s most recent models, and each is supplied with a spare light carrier, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are black.

The Howarth-Jackson’s Instruments are less expensive than other American or English models, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., LTD.
SURGICAL INSTRUMENT MAKERS

LONDON, S.E.1
(Opposite Guy’s Hospital)
The Choice of Medical Men

for their own deafness or to recommend to patients is the “Ardente” method because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service of its originator—Mr R. H. Dent—not any mere selling agent or company.

It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

“Ardente” is also the Choice of

Prof. Sir Ambrose Fleming, Kt., M.A., B.Sc., F.R.S.
Col. Sir Henry Knollys, K.C.V.O.
The late Gen. Bramwell Booth, C.H., and
Major F. E. Verney, M.C.

and many leading medical men—professional etiquette makes it necessary for us to withhold their names. “ARDENTE” is shown and appreciated at every B.M.A. meeting and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

“Ardente” is the choice of every important medical journal and TRUTH and for use at Hospitals and supplied through charities, Government Departments (also used by government officials). Behind “ARDENTE” is a personality—his interest is yours, his success built by his users who chose “Ardente” on its merits—

Mr Dent is the inventor of “Ardente.”
Mr Dent is the pioneer of individual ear-fitting.
Mr Dent is the originator of the “Free Home Test.”

The most Complete and Extensive Service for the Deaf under personal supervision

309 Oxford Street, London, W.1
(Between Oxford Circus and Bond St. Tube Stations)

“Ardente” can be tested Free at any of our SERVICE BUREAUX—the most complete in the whole deaf world—or at Doctors’ surgeries or patients’ homes any day any time—weekends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you at your or any of our addresses if Deaf yourself or interested on behalf of patients.

Please ask for “Medical Reports”
ADVERTISEMENTS

THE “STERLING” AUTOMATIC ELECTRIC
Mouth and Throat Lamp
(PATENTED)

THE “STERLING LAMP” is the only combined automatic Mouth and Throat Lamp and Tongue Depressor, and is ideal for quick examination. A slight pressure on the tongue with the removable blade bringing the bulb into contact.

Economical.—The light is only on while lamp is in actual use, the removal of the depressor from the tongue immediately bringing the bulb out of contact.

Assistant Surgeons
Mr DINGLEY Mr HOWELLS
Mr SANDIFORD Mr WILSON

The Hospital has recently undergone very extensive reconstruction and extension, and now has 73 beds for In-patients and an annual Out-patient attendance of about 40,000.

CLINICAL INSTRUCTION
Clinical Instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is daily given in the Out-patient Department from 2 to 5 p.m. On Tuesdays and Fridays from 6.30 to 8 p.m. also. Major operations are performed daily, except Mondays, in the In-patient Operating Theatres. Minor operations are performed in the Out-patient Department by the Assistant Surgeons on four mornings a week.

Practitioners and Medical Students are admitted to the practice of the Hospital, and Clinical Assistants, whose duty it is to assist the staff, are appointed from time to time among them. For further information apply to the Dean, Mr BEDFORD RUSSELL.

### VACCINES

**For Prophylaxis against Respiratory Infections**

The micro-organisms most commonly found in patients suffering from "colds" are Pneumococcus, Pfeiffer's Bacillus, *Micrococcus catarrhalis* and *Bacillus septus*; and these are included in the **Anti-Catarrh Vaccine** prepared in the Department for Therapeutic Inoculation, St Mary's Hospital, W.2, specially for the prophylaxis of colds in adults.

A slightly modified formula is supplied under the title **Anti-Catarrh (Public Schools) Vaccine**.

It is generally agreed that the serious and sometimes fatal complications of influenza—such as bronchitis and pneumonia—as well as many of the less severe symptoms, are caused by infection with Pfeiffer's Bacillus, Pneumococcus and Streptococcus. On this account the **Anti-Influenza Vaccine (Mixed) St Mary's Hospital Formula**, which contains these three organisms, is of great value as a prophylactic of influenza.

*Details of these and other Vaccines supplied on request by the Sole Agents.*
