THE ART OF MEDICINE

OVER 2,000 YEARS OF IMAGES AND IMAGINATION

The Art of Medicine takes readers on a fascinating visual journey through the history of medical practice, exploring contemporary biomedical images, popular art, and caricature alongside venerable Chinese scrolls, prehistoric Mesoamerican drawings, paintings of the European Renaissance, medieval Persian manuscripts, and more.

SAVE LIVES:
Clean **Your** Hands

**5 MAY 2014 - No action today; no cure tomorrow – make the
WHO 5 Moments for Hand Hygiene part of protecting your
patients from resistant germs.**

The WHO **Clean Care is Safer Care** programme is again promoting its global annual hand hygiene campaign *SAVE LIVES: Clean Your Hands on 5 May 2014*. This year is linking this important life-saving action with the important global agenda of addressing antimicrobial resistance.

The **WHO focus** remains on improving and sustaining hand hygiene and helping to save lives by reducing health care-associated infection, with the additional reminder how resistant organisms threaten health security.

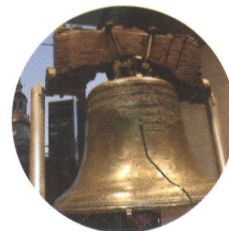

Register your health-care facility in the WHO *SAVE LIVES: Clean Your Hands* global campaign NOW if you have not already done so - help WHO to reduce the number of countries with NO or few health-care facility registrations. Go to <http://www.who.int/gpsc/5may/register/en>

Plan to take part – join WHO in understanding more about antimicrobial resistance and hand hygiene by taking part in our 2014 surveys and other proposed activities. Go to www.who.int/gpsc/5may/en

**Follow the programme on Twitter and Facebook World Health
Organization**
