

THE PATIENT BELIEVES IT'S STERILE

NOW.. . A sterile instrument for each patient procedure every time.

A single standard of practice. standardized, documented sterile processing which is safe for your instruments.

A single standard of care. availability of sterilized instruments for each patient procedure.

STERIS SYSTEM 1™ permits you to safely sterilize instruments which you are currently disinfecting between patient procedures. Even heat sensitive rigid and flexible scopes, cameras, and microsurgical instruments can be safely sterilized and ready for use in the standard 20 minute cycle.

STERIS. guaranteed sterilization every time and Just In Time for each patient procedure.

EPA registered, FDA reviewed, and selected by hospitals across the U.S. as the preferred standard of practice.

THREAT**

"HANDS-OFF"

INJECTOR
Tubex®
(closed injection system) Ayerst

TUBEX®, the unique, *safer*, hands-off injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching... shaking... manipulation of cartridge or needle. Just twist and drop.

Nurses preferred TUBEX almost 3:1 for the prevention of accidental needle stick injuries in a study comparing TUBEX Injector and Carpuject®.*¹ Which is one more reason to

adopt TUBEX- the injection system designed as if your life depended on it.

**FARTHER FROM
THE POINT OF
DANGER**
