

The Operational Research Society
Special Interest Group on Agriculture and Natural Resources
2nd April 2009

A one-day technical meeting themed on 'Making better decisions for the management or governance of the agricultural and natural resource industries' will be held at the Frank Parkinson Room, University of Reading. This event is organised by The Operational Research Society's (<http://www.theorsociety.com>) Special Interest Group on Agriculture and Natural Resources. A cover charge for the catering will apply.

To book and for further details contact:

Editor

Dave Harris, Bangor University, UK

Experimental Agriculture publishes the results of original research, from any source, on the agronomy of field, plantation and herbage crops grown for human or animal food, or for industrial purposes, and on systems of agricultural production, including livestock. With a focus on the warmer regions of the world, it reports on the results of experimental work designed to explain how crops respond to the environment in biological, and physical terms, and on the social and economic issues that may influence the uptake of the results of this research by farmers.
