Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of JMR and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the Journal of Materials Research electronically via ScholarOne, at the following website address: http://mc.manuscriptcentral.com/jmr. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½” x 11 in. paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the JMR keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author’s request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <color online> in the figure captions. This is the author’s responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white and see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, Journal of Materials Research, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in Journal of Materials Research may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via the Cambridge Journals Online website. To determine availability, visit the appropriate page for the JMR back issue desired (www.journals.cambridge.org/jmr).

Individual member subscriptions are for personal use only.
INVITED PAPERS

2197–2203 The ultimate efficiency of organolead halide perovskite solar cells limited by Auger processes
Ibraheem Almansouri, Martin A. Green, Anita Ho-Baillie

2204–2213 Growth and characteristics of AlGaN/GaN heterostructures on sp²-bonded BN by metal–organic chemical vapor deposition
Qing Paduano, Michael Snure, Gene Siegel, Darren Thomson, David Look

ARTICLES

2214–2222 Microstructure and mechanical properties of Laves phase NbCr₂-based composites toughened with Cr phase fabricated by spark plasma sintering
Kewei Li, Rui Hao, Chao Di, Dianqing Gong

2223–2232 Microstructures and mechanical properties of bulk nanocrystalline silver fabricated by spark plasma sintering

2233–2243 Sintering phenomena and mechanical strength of nickel based materials in direct metal laser sintering process—a molecular dynamics study
Yi Zhang, Jing Zhang

2244–2251 Direct foaming and seeding of highly porous, lightweight gypsum
Elisabet Roch Isern, Gary L. Messing

2252–2260 Visible-light responsive plasmonic Ag₃O/Ag/g-C₃N₄ nanosheets with enhanced photocatalytic degradation of Rhodamine B
Shurong Fu, Yiming He, Qi Wu, Ying Wu, Tinghua Wu

2261–2267 Encapsulation of modified pigment yellow 110 (PY110) for electrophoretic display
Guoxiang Li, Shuxian Meng, Yaqing Feng

2268–2276 Photoluminescence of (La,Eu)₂O₂SO₄ red-emitting phosphors derived from layered hydroxide
Xuejiao Wang, Ji-Guang Li, Qi Zhu, Xudong Sun

2277–2283 Fabrication of carbon nanotube reinforced A356 nanocomposites
Hong Yan, Hongxu Qiu

2284–2290 Metalized carbon nanotubes as a conductive material for energy storage devices
Feryan Ahmed, Eric Eisenbraun, Sarah Ashmeg

2291–2301 Surface microstructure characterization on shot peened (TiB + TiC)/Ti–6Al–4V by Rietveld whole pattern fitting method
Lechun Xie, Qiang Feng, Yan Wen, Liqiang Wang, Chuanhai Jiang, Weijie Lu

2302–2316 Structural features of core–shell zeolite–zeolite composite and its performance for methanol conversion into gasoline and diesel
Jiajun Zheng, Xiaobo Sun, Yanzhu Du, Bo Qin, Yanyu Zhang, Hongyan Zhang, Meng Pan, Ruiqin Li

2317–2328 Synthesis and their photocatalytic properties of Ni-doped ZnO hollow microspheres
Yuanyou Wang, Tianqiang Liu, Qingli Huang, Changle Wu, Dan Shan

2329–2336 Orientation dependence of swift heavy ion track formation in potassium titanyl phosphate
Yu-Jie Ma, Pablo Mota Santiago, Matias D. Rodriguez, Felipe Kremer, Daniel Schaer, Boshara Al-Sheikh, Thomas Bierschenk, David J. Llewellyn, Fei Lu, Mark C. Ridgway, Patrick Kluth
