

## INDEX OF SUBJECTS

- Actinomyces bovis*, life cycle of, 46  
 Adrenal cortical hormone, action on white blood corpuscles of bovines at parturition, 67  
 Agar, commercial, gel-producing properties of, and influence on bacterial growth, 127  
 Air disinfection, physical aspects of, 382
- Bacillus anthracis*, bacteriophage specific for, 114  
 Bacteria, survival of, during and after drying, 220  
 Bacterial densities, estimation of, from dilution series, 26  
 Bacteriophage specific for *Bacillus anthracis*, 114  
 Bacteriophage, symbiotic, as 'marker' in the identification of strains of *Salmonella typhi-murium*, 442  
 Bacteriophage, virulence and agglutination tests with a strain of *Salmonella typhi* of low virulence, 349.  
*Bacterium coli*, kinetics of the lysis of, by glycine, 169  
 Blood culture in enteric fever, factors influencing results of, 315  
 Bovine tubercle bacilli, reaction of rabbit tissues to infection with, 181, 189  
 Bovines, reaction of white blood corpuscles at parturition, 67
- Cambridge University Health Service records, statistical analysis of, 81  
 Canine virus hepatitis, complement-fixation and precipitin tests, 410  
 Canine virus hepatitis, pathology of experimental disease, 482  
*Clostridium botulinum*, pathogenicity of the spores of, 36  
 Cold, common, in rural community, 365.  
*Coli-aerogenes* bacteria in soils, 162  
 Common cold in rural community, 365  
 Cortisone, action on white blood corpuscles of bovines at parturition, 67  
 Cross-infection, inter-hospital, of epidemic infantile gastro-enteritis associated with type strains of *Bacterium coli*, 152  
 Cylinder model vacuum cleaners, use of, 497
- $\delta$ -lysin, standardization of staphylococcal  $\alpha$ -antitoxin with reference to, 52  
 Diphtheria in immunized, with observations on diphtheria-like disease associated with non-toxicogenic strains of *Corynebacterium diphtheriae*, 205  
 Disinfection of air, physical aspects of, 382  
 Drying, survival of bacteria during and after, 220
- Enteric fever, factors influencing results of blood culture in, 315  
 Enteric infection, double, account of an epidemic of, 299
- Gastro-enteritis, infantile, associated with type strains of *Bacterium coli*, 152  
 Gastro-enteritis, infantile, spread of, in cubicle ward, 140  
 Glycine, kinetics of the lysis of *Bacterium coli* by, 169  
 Graham-Smith, George Stuart (1875-1950), obituary notice, 13
- Hepatitis, canine virus. *See* Canine virus hepatitis.  
 Hospital wards, single-room provision in, 452
- Infantile gastro-enteritis associated with type strains of *Bacterium coli*, 152  
 Infantile gastro-enteritis, spread of, in cubicle ward, 140  
 Infectious mononucleosis, ox cell haemolysin test for diagnosis of, 471  
 Influenza virus titration, surviving tissue suspensions for, 247
- Journal of Hygiene*, 1901-1950, account of, 1

- Life cycle of *Actinomyces bovis*, 46  
 Life cycle of *Nocardia*, 175  
 Lysis of *Bacterium coli* by glycine, kinetics of, 169  
 Lysogenic *Bacillus* strain, studies on, 114
- Mononucleosis, infectious, ox cell haemolysin test for diagnosis of, 471
- Nocardia*, observations on life cycle of, 175  
 Non-toxicogenic strains of *Corynebacterium diphtheriae*, diphtheria-like disease associated with, 205  
 Nucleus, bacterial spore, observations upon, 201
- Obituary notice, George Stuart Graham-Smith (1875–1950), 13  
*Oryzomys palustris natator* as possible laboratory animal, 427  
 Ox cell haemolysin test for diagnosis of infectious mononucleosis, 471
- p*-nitrophenyl diethyl thiophosphate (E. 605), chronic toxicity of, 430
- Rat, swamp rice, as possible laboratory animal, 427  
*Rattus norvegicus*, damage to wheat by, 22  
 Rubarth's disease. *See* Canine virus hepatitis
- Salmonella typhi*, bacteriophage virulence and agglutination tests with a strain of low virulence, 349  
*Salmonella typhi*, mouse-virulence of strains of, in typhoid fever, 111  
*Salmonella typhi*, pathogenic and immunogenic activities of, in relation to its antigenic constituents, 92  
*Salmonella typhi*, Vi-phage types F1 and F2 of, 458  
*Salmonella typhi-murium*, symbiotic bacteriophage as a 'marker' in the identification of, 442  
 Single room provision in hospital wards, 452  
 Soils, *Coli aerogenes* bacteria in, 162  
 Spore, bacterial, observations on nucleus of, 201  
 Spores of *Clostridium botulinum*, pathogenicity of, 36  
 Staphylococcal  $\alpha$ -antitoxin, standardization of, 52  
 Staphylococci isolated from hospital patients, penicillin sensitivity and phage types of, 263  
 Swamp rice rat as possible laboratory animal, 427  
 Symbiotic bacteriophage as 'marker' in the identification of strains of *Salmonella typhi-murium*, 442
- Tissue suspensions, surviving, for influenza virus titration, 247  
 Toxicity, chronic, of *p*-nitrophenyl diethyl thiophosphate (E. 605), 430  
*Trichomonas vaginalis*, survival of, below +37° C., 400  
 Tubercle bacilli, bovine, reaction of rabbit tissues to infection with, 181, 189  
 Typhoid fever, hospital outbreak of, 324  
 Typhoid fever, bacteriological and serological investigations in a hospital outbreak of, 335  
 Typhoid fever, mouse virulence of strains of *Salmonella typhi* in, 111  
 Typhoid vaccine, alcohol-killed and alcohol-preserved, immunizing potency of, 288  
 Typhoid vaccine, preparation, testing and standardization of, 268
- Vacuum cleaner, use of cylinder model, 497  
 Vi-phage types F1 and F2 of *Salmonella typhi*, 458
- White blood corpuscles in bovines at parturition, reaction of, 67
