Applied Psycholinguistics publishes original research papers on the psychological processes involved in language. It examines language development and disorders in adults and children with and without developmental disabilities. Articles in Applied Psycholinguistics address the nature, acquisition, and impairments of language expression and comprehension, including writing and reading. This journal gathers together the best work from a variety of fields including linguistics, psychology, reading, education, language learning, sociology, speech and hearing, and neurology. In addition, issues include reviews of important new books, problem-oriented reviews of important or emergent areas, discussions of previously published papers, and methodological notes.

Behavioral and Brain Sciences, with its imposing ISI Impact Factor of 12.818, is an internationally renowned journal with an innovative format. Significant and controversial pieces of work are published from researchers in psychology, neuroscience, behavioral biology or cognitive science, together with 20–30 commentaries on each article from specialists in these disciplines, plus the author’s response to them. The result is a unique forum for communication, criticism, stimulation, and unification of research in behavioral and brain sciences – from molecular neurobiology to artificial intelligence and the philosophy of the mind.
Bilingualism: Language and Cognition is an international peer-reviewed journal focusing on bilingualism from a cognitive science perspective. The aims of the journal are to promote research on the bilingual person and to encourage debate in the field. The domains covered are the following: bilingual language competence, perception and production, bilingual language acquisition in children and adults, neurolinguistics of bilingualism (in normal and brain-damaged populations), and non-linguistic cognitive processes in bilinguals. Bilingualism carries articles and research notes on all aspects of the bilingual person, and is published three times a year.

Journal of the International Neuropsychological Society

Published for the International Neuropsychological Society

Editor-in-Chief
Kathleen Y. Haaland, NM VA Healthcare System, Albuquerque, US

JINS aims to further scientific and research activities in neuropsychology and enhance communication among its cognate member disciplines. The journal publishes scholarly, peer-reviewed articles and includes original research, timely review articles and transactions of the annual meetings of the International Neuropsychological Society. Contributions reflect the interest of all areas of neuropsychology, including (but not limited to): development of cognitive processes, brain–behavior relationships, adult neuropsychology, child neuropsychology, developmental neuropsychology, disorders of speech and language, and related topics such as behavioral neurology, neuropsychiatry, neuroimaging, and electrophysiology.
Psychological Medicine

Editors
Kenneth S. Kendler, Virginia Institute for Psychiatric Behavioral Genetics, Virginia, USA
Robin M. Murray, Institute of Psychiatry, London, UK

Now in its fifth decade of publication, Psychological Medicine is a leading international journal in the fields of psychiatry, clinical psychology and the related basic sciences. There are twelve issues per year, each featuring original articles reporting key research being undertaken worldwide, together with shorter editorials by distinguished scholars and an important book review section. The journal's success is clearly demonstrated by a consistently high Impact Factor.

Abstracting

The journal is covered by relevant abstracting and indexing services including:

- Abstracts in Anthropology
- Association for Education and Rehabilitation of the Blind and Visually Handicapped Yearbook
- Applied Social Sciences Index & Abstracts
- Bibliography of Developmental Medicine & Child Neurology
- British Education Abstracts
- Chicorel Abstracts to Reading and Learning Disabilities
- Child Development Abstracts
- Communication Abstracts
- Current Contents
- Current Index to Journals in Education
- Education Index
- Education Resources Information Center (ERIC)
- Language Teaching
- Linguistic Abstracts
- Linguistic Bibliography
- Linguistics and Language Behavior Abstracts
- Psychological Abstracts
- Sage Family Studies Abstracts
- Social Science Citation Index
- Sociological Abstracts

Editorial Policy

The journal publishes material on all aspects of the scientific study of language in children, the principles which underlie it, and the theories which may account for it. Articles can report findings from naturalistic observations or experiments; and the subject-matter may include phonology, phonetics, morphology, syntax, vocabulary, semantics, pragmatics, sociolinguistics, or any other recognized facet of language study. Articles may concern the acquisition of one language, or they may have a crosslinguistic focus; they may relate to the study of individuals or of groups of children. Articles should make a theoretical, conceptual and/or methodological advance in our understanding of language development in children.
