Political Science Research and Methods

Political Science Research and Methods (PSRM) is a general political science journal dedicated to publishing original scholarly work of the highest quality from all subfields of political science. PSRM also welcomes work at the intersection of political science and related disciplines. Manuscripts should apply rigorous methods to empirical or theoretical problems. PSRM is the official journal of the European Political Science Association (EPSA), the organization that sets the journal’s policies.

Editors-in-chief: Vera E. Trüger, University of Warwick, UK
Associate Editors: Cameron G. Thies, Arizona State University, USA
Kathryn Benford, London School of Economics, UK
Simon Hix, University of Geneva, Switzerland
Paul Kellstedt, Texas A&M University, USA
Massimo Morelli, Bocconi University, Italy
Daniel Steinmeier, Duke University, USA
Media Editors: Mary Steinmayer, University of Missouri, USA
Lauren Williams, University of Missouri, USA
Macartan Humphreys, Columbia University, USA
Willian T. Bernard, University of Illinois
Brad Jones, University of California at Davis, USA
Jane Green, University of Manchester, UK
Denise Laroze, University of Essex, UK
Berkeley, USA
Dominik Hangarter, London School of Economics, UK
Frederick Boehmke, University of Iowa, USA
William Berry-Eschbach, Texas A&M University, USA
Margit Busum, University of Göttingen, Germany
Michael Colaresi, Michigan State University, USA
Catherine De Vries, Linz University, Oxford, UK
Torben Dwørk, London School of Economics, UK
Fabio Franchino, University of Milan, Italy
Rob Franzese, University of Michigan, USA
Siegfried Gais, University of California, Berkeley, USA
Fabrizio Gilardi, University of Zurich, Switzerland
Sona Gold, London School of Economics, UK
Jane Green, University of Manchester, UK
Jens Hainmüller, Massachusetts Institute of Technology, USA
Mark Halsey, Hertie School of Governance, Germany
Dominik Hangarter, London School of Economics, UK
Jane Green, University of Manchester, UK
McKnight Howes, Pennsylvania State University, USA
Simon Hix, London School of Economics, UK
MacKart Howes, Columbia University, USA
Indrė Indrišienė, University of California, Riverside, USA
Brad Jones, University of California at Davis, USA
Jeff Karp, University of Exeter, UK

Notes for Contributors
All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at http://mc.manuscriptcentral.com/psrm
Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

- full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
- research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. PSRM welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary. If you feel strongly about a fully anonymous review process, you may opt out and your manuscript will undergo a double blind review process.

Replication Policy: PSRM has a strict replication policy which adheres to the Data Access and Research Transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the PSRM Dataverse at https://dataverse.harvard.edu/dataverse/PSRM. (See the PSRM Dataverse Guide for a step-by-step walkthrough for uploading your material, which is also linked to on the PSRM Dataverse homepage.) This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by PSRM staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MC, MC simulations) we require all studies to replicate material and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 percent from published results in the manuscript.
Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material. All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at http://www.journals.cambridge.org/psrm/rtc

Rights and Permissions info
All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. This journal is registered with the Copyright Clearance Center, 22 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with the C.C.C. may, therefore copy material beyond the limits permitted by, sections 107 and 108 of U.S. Copyright law subject to payment to the C.C.C. of the appropriate fee per copy. This consent does not extend to multiple copying for promotional or commercial purposes. For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Subscriptions
Political Science Research and Methods is published four times a year in January, April, July, and October. The 2017 subscription price (excluding VAT) of a volume, which includes print and electronic access, is $249.00 (US $611.00 in USA, Canada and Mexico), £155.00 (US $238.00) for individuals, which includes print and electronic access, ordering direct from the publishers and certifying that the journal is for their personal use. The electronic-only price available to institutional subscribers is $367.00 (US $588.00 in USA, Canada and Mexico). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country’s rate. VAT registered subscribers should provide their VAT registration number. Prices include delivery by air when appropriate. Japanese prices for institutions are available from Kodansha Company Ltd, P.O. Box 55, Chisago, Tokyo 156, Japan. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK; or in the USA, Canada and Mexico: Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Periodicals postage paid at New York, NY and additional mailing offices.
Contents

1 A Political Economy of Income Tax Policies
   Bruce Bueno de Mesquita, George Downs and Alastair Smith

31 Dependency Status and Demand for Social Insurance: Evidence from Experiments and Surveys
   John S. Ahlquist, John R. Hamman and Bradley M. Jones

   Stefanie Walter

81 Elections and Civil War in Africa
   José A. Cheibub and Jude C. Hays

103 Preventive War as a Result of Long-Term Shifts in Power
   Colin Kairinin

123 Rationalist Experiments on War
   Kai Quek

143 Hazards or Hassles: The Effect of Sanctions on Leader Survival
   Amanda A. Licht

163 Information Manipulation and Reform in Authoritarian Regimes
   Jidong Chen and Yiqing Xu

RESEARCH NOTES

179 The Correlates of Media Freedom: An Introduction of the Global Media Freedom Dataset
   Jenifer Whitten-Woodring and Douglas A. Van Belle

189 Heterogeneity in the Militarized Interstate Disputes (MIDs), 1816–2001: What Fatal MIDs Cannot Fix
   Douglas M. Gibler and Erin K. Little
