DR. B. P. PAL (*India*)

DR. S. J. DU PLESSIS (*South Africa*)

**Experimental Agriculture** publishes the results of research on crops, herbage and forage, with the main emphasis on field experiments relevant to husbandry in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

**Experimental Agriculture** is published quarterly. Four parts form a volume.

**Subscriptions** may be sent to any bookseller or subscription agent or direct to Cambridge University Press, P.O. Box 92, London NW1 2DB or in the U.S.A. and Canada to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The 1975 subscription price is £11.50 net (including postage) for a volume (US\$34.00 in the U.S.A. and Canada), payable in advance; separate parts cost £4.00 net or \$12.00 each (plus postage). Second class postage paid at New York, N.Y.

**Back Volumes.** Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of Cambridge University Press.

**Permissions.** For permission to reproduce material from *Experimental Agriculture*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A., is authorized to supply single copies of separate articles for private use only.

## NOTES FOR CONTRIBUTORS

**Contributions** will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, The Spinney, Wrington, Bristol BS18 7LB, England.

**Conditions of acceptance.** Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

**General lay-out.** Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in a recent number of this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 2000 words (4 pages) or longer than about 6000 words (12 pages including illustrations).

**Typescripts.** A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

**Title.** The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, make it essential that the title of each paper should contain the maximum of relevant informa-

Vol. 13, No. 1

1975

## CONTENTS

*Animal Production*

The replacement of sugar with maize in diets for broilers by P. R. Keen and A. J. Smith

A note on copper supplementation of bacon pig diets based on fish meal or on extracted soyabean meal, by D. B. Bellis

*Tobacco*

Fungicide control of barn rot of flue-cured tobacco caused by *Rhizopus arrhizus*, by J. S. Cole

*Groundnuts*

Changes in kernel quality of a long-seasoned groundnut (*Arachis hypogaea* L.) variety during maturation, by H. R. R. Metelerkamp and G. L. Hildebrand

The growth of groundnuts (*Arachis hypogaea* L. cv. Makulu Red) at three altitudes in Rhodesia, by J. H. Williams, J. H. H. Wilson and G. C. Bate

*Macadamia*

Methods of estimating leaf area from linear measurements of the *Macadamia integrifolia* cultivar 'Kakea', by D. B. Cormack and G. C. Bate

*Veld Poisoning*

Determination of monofluoroacetate in *Dichapetalum cymosum* (Hook) Engl., by J. Tannock

*Research Notes*

A comparison of fertilizer borate and colemanite incorporated in granular fertilizers, by A. W. G. Rowell and P. M. Grant

Seasonal variation in toxicity of *Dichapetalum cymosum* (Hook) Engl. in the Nyamandhlovu area, by J. Tannock

*Book Reviews*

Published twice annually

Annual subscription R\$3.00

Single numbers R\$1.50

Specimen copies available to libraries from:

The Assistant Editor,  
Rhodesian Journal of  
Agricultural Research  
P.O. Box 8108, Causeway,  
Salisbury, Rhodesia

## Principles of Environmental Physics

*Contemporary Biology Series*

John L. Monteith

The author reviews the relevant basic physics before progressing to a discussion of radiation exchange and heat, mass and momentum transfer. The second half of the book examines the application of these transfer principles to the heat balance of plants and animals, and to the micrometeorology of crops.

Cloth £6.00 net Paper £3.00 net

## Handy Matrices of unit conversion factors for biology and mechanics

C. J. Pennycuik

Scientists confronted with the various systems of unit used in the scientific and technical literature have long been in need of a convenient source of conversion factors. The main purpose of this book is to provide a generous selection of conversion factors, arranged in such a way that the particular one required can be rapidly located.

Limp 95p net

## 46: An Introduction to Animal Breeding Studies in Biology

John C. Bowman

An introduction to qualitative genetics and animal breeding. The book opens with a discussion of biological variation in farm animals, in which the genetic distinction and similarity between characters showing discrete (qualitative) and continuous (quantitative) variation are emphasised.

Cloth £1.70 net Limp 75p net

## 50: Pest Control and its Ecology

*Studies in Biology*

H. F. van Emden

Pest control is a study of applied biology; there is more to such control than applying poisonous chemicals. The problem is largely ecological and touches our food supply, our standard of living and our environment. This book is a condensation of the whole spectrum of crop protection methods, with an explanation of why each method was developed and under what conditions it works.

Cloth £1.90 net Paper 95p net

## Pests of Field Crops

*Second Edition*F.G.W. Jones and  
Margaret G. Jones

The wide range of topics so competently presented in this book is unrivalled by other publications. Whilst the form of the first edition text is retained, it has been substantially revised to incorporate much new information, particularly in relation to recent advances in our knowledge of the nature of pesticides.

Cloth £8.50 net

# TROPICAL AGRICULTURE

THE JOURNAL OF THE FACULTY OF AGRICULTURE (IMPERIAL COLLEGE OF  
TROPICAL AGRICULTURE) UNIVERSITY OF THE WEST INDIES

Volume 52, Number 1, January 1975

Leaching of nitrate under maize at Samaru, Nigeria

*M. J. Jones*

Limitations of foliar diagnosis with special reference to the oil palm

*E. W. Bolle-Jones*

Sorghum varieties for the late season in Nigeria

*D. J. Andrews*

Development of a maize breeding programme in Zambia. I—Formation of Zambia Composite A and description of the breeding system adopted

*J. B. Abington*

Development of a maize breeding programme in Zambia. II—Evaluation of introduced material and formation of Zambia Composite Z

*J. B. Abington*

Relationship between the content of oil, protein, and sugar in mung bean seed

*T. Hymowitz, F. I. Collins and J. M. Poehlman*

Slaughter characteristics of N'Dama cattle in Sierra Leone

*W. D. Boston, J. S. Leigh, J. R. Romans, H. W. Norton and J. Kastelic*

Supplementary feeding of grazing dairy cows in Uganda

*R. H. Phipps and W. Holmes*

Irrigated Upper Amazon cacao in the Lower Shire Valley of Malawi. I—NPK factorial trial

*G. R. Lee*

Cocoa pollination by males of *Forcipomyia squamipennis* (Diptera : Ceratopogonidae) in Ghana

*T. Kaufmann*

Assessment of field resistance to Pangola stunt virus (PSV) of *Digitaria* introductions in Surinam and Guyana

*A. E. S. Hunkar, A. Tjong A. Hung, I. G. Dulder, S. C. Schank, N. Holder and C. Edwards*

The nectar bat, *Glossophaga soricina*, as a pest of bananas in Panama

*C. S. Stephens and E. L. Tyson*

Book Reviews

Annual subscription: £12.00 (U K) and £14.00 (overseas) (\$35.00 in the U.S.A. and Canada) for four quarterly numbers

Published on behalf of the Faculty by

IPC Science and Technology Press Limited

IPC House, 32 High Street, Guildford, Surrey, GU1 3EW, England

## THE Journal of the British Grassland Society

A medium for the publication of the results of research  
and practical experience in grassland husbandry and  
forage production

Published quarterly. Annual Subscription £10.00 or \$24.40

Orders to: The Secretary, British Grassland Society  
c/o Grassland Research Institute, Hurley, Maidenhead,  
Berks, SL6 5LR, England

Articles for publication should be sent to:

A. G. G. Hill (Editor), Dellwood, Windrush, Burford, Oxford OX8 4TR

Articles from overseas can be accepted, provided that they have some  
relevance to grassland research or practice in Britain.
