The originally published version of this article contained the following errors:

In Table 2, the Wald Difference Test $df$ value for “Maltreatment $\rightarrow$ BPD symptom severity/Caucasian” was incorrectly printed. This value should be 1.

In the caption to Figure 2, $\beta$ was not included in the following sentence: “Standardized ($\beta$) coefficients were estimated separately for each MAOA group.”

In the caption to Figure 3, $\beta$ was not included in the following sentence: “Slope values are standardized ($\beta$) coefficients extracted from multiple-mediation model with antisocial personality disorder symptoms (ASPD) symptom severity as an outcome.”

In the caption to Figure 4, $\beta$ was not included in the following sentence: “Standardized ($\beta$) coefficients were estimated separately for each MAOA group.”

The publisher apologizes for these errors. In regards to the error in Table 2, the original article has since been updated.
