As members of the Philosophy of Science Association will probably already have heard, Professor Carl G. (Peter) Hempel died in Princeton on November 9th, 1997. His influence on philosophy of science in the English-speaking world was as great as that of any other twentieth-century figure, and he did much to shape our association. Because of his extraordinary teaching, Peter inspired a large number of philosophers to wrestle with the problems of our field. He has left us an ideal of how to practice philosophy, how to teach it, and how to live. The many members of PSA who knew, loved, and admired him will miss him greatly.

PSA PRIZES FOR YOUNG SCHOLARS

The Philosophy of Science Association is happy to announce that the prizes for young scholars will again be offered in 1998. The first of these is for an essay written by a graduate student; the second is for an essay by someone who has received the Ph.D. within the last five years. Essays may be on any topic in the philosophy of science, and should be submitted to the Editor-in-Chief of *Philosophy of Science* before September 1, 1998. The essays will be judged by a committee of three senior members of the PSA.

Winners in each category will receive \$250, and the winning essay will be published in *Philosophy of Science*. A person who is eligible to enter may submit for consideration an essay already accepted for publication in *Philosophy of Science* within the period September 1 1997 to September 1 1998. When the winning essays are published, they will be accompanied by an announcement to the effect that they were judged the best in this year's competition.

The financial support for the prizes has been made possible by the generosity of past presidents of the PSA.

PRIZE WINNERS 1997

The prize for an essay submitted by a recent Ph.D. was awarded to Christopher Hitchcock for "The Common Cause Principle in Historical Linguistics," scheduled to appear in *Philosophy of Science* in September 1998.

The Prize Committee for 1997 consisted of Peter Achinstein, David Hull, and Dudley Shapere. Their prompt and careful work in evaluating the submissions is much appreciated.
