GUIDELINES FOR CONTRIBUTORS

Manuscripts are considered for publication on the understanding that they are not currently under consideration elsewhere and that the material – in substance as well as form – has not been previously published. Two copies of the manuscript should be submitted. Each article should be accompanied by a summary, not exceeding 100 words, outlining the principal conclusions and methods in the context of currently accepted views on the subject. All material – including quotations and notes – must be double-spaced with generous margins. Use of dot-matrix printers is discouraged. Notes should be numbered consecutively and placed at the end of the text. Spelling should be consistent throughout (e.g. Labour and Labor are both acceptable, but only one of these forms should be used in an article). Turns of phrase using masculine forms as universals are not acceptable.

For over thirty three years *Itinerario* has provided a platform for scholars researching the history of European expansion in the context of colonialism between c.1500 and 1950. Contributors are encouraged to take a global perspective and consider the international interaction of European countries from both a Western and non-Western viewpoint, analysing the impact of this interaction on World History in general. The journal also publishes a highly respected book review section, which covers around 100 monographs per volume.

In 2009, the International Labour Organization (ILO) celebrated its ninetieth anniversary. The First World War and the revolutionary wave it provoked in Russia and elsewhere were powerful inspirations for the founding of the ILO. There was a growing understanding that social justice, in particular by improving labour conditions, was an essential precondition for universal peace. Since then, the ILO has seen successes and set-backs; it has been ridiculed and praised. Much has been written about the ILO; there are semi-official histories and some critical studies on the organization’s history have recently been published. Yet, further source-based critical and comprehensive analyses of the organization’s origins and development are still lacking. The present collection of eighteen essays is an attempt to change this unsatisfactory situation by complementing those histories that already exist, exploring new topics, and offering new perspectives. It is guided by the observation that the ILO’s history is not primarily about «elaborating beautiful texts and collecting impressive instruments for ratification» but about effecting «real change and more happiness in peoples’ lives».

Contemporary European History covers the history of Eastern and Western Europe, including the United Kingdom, from 1918 to the present. By combining a wide geographical compass with a relatively short time span, the journal achieves both range and depth in its coverage. It is open to all forms of historical inquiry - including cultural, economic, international, political and social approaches - and welcomes comparative and transnational analysis. One issue per year explores a broad theme under the guidance of a guest editor. The 2009 issue will examine the historical turning point of ‘1989’ from a Pan-European perspective. The journal regularly features contributions from scholars outside the Anglophone community and acts as a channel of communication between European historians throughout the continent and beyond it.
