Featured in this issue

POLICIES
Oriol de Solà-Morales et al.: Innovation in new medicines: systematic review
Andrés Pichon-Riviere et al.: HTA in Latin America: good practice principles
Andres Pichon-Riviere et al.: Stakeholder involvement in HTA in Latin America
Wija Oortwijn et al.: Role of horizon scanning revisited
Yot Teerawattananon et al.: HTAsianLink development and its key to success

METHODS
Axel C. Mühlbacher et al.: Patient priorities for treatment attributes in adjunctive drug therapy
Julie Polisena et al.: HTA methods guidelines for MDs
Murray Krahn et al.: The Ontario decision framework
Karla Hernandez-Villafuerte et al.: PFS as a surrogate for OS in oncology
Julie Polisena et al.: Environmental impact assessment of a health technology

ASSESSMENTS
Herbert J.A. Rolden et al.: Review of economic models on dabigatran in AF
Phuong Lien Tran et al.: Digital images performance for cervical cancer screening
Luiza Raquel Grazzotin et al.: HTA of amphotericin B lipid formulations

Assessment in Health Care

of the international community in its parts can benefit the whole. With the scholars, governments, and private institutions concerned about understanding its effects. Further, it is important to establish ties among organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social andorganizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community and its parts. Among the different countries and in their encounter with health care technology, viewed comparatively, is available under understanding its effects. Further, it is important to establish ties with the scholarly, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. ## CONTENTS

**Policies**

- **224** Defining innovation with respect to new medicines: A systematic review from a payer perspective  
  Oriol de Solà-Morales, David Cunningham, Mathias Flume, Paul M. Overton, Natalie Shalet and Stefano Capri

- **241** Health technology assessment for decision making in Latin America: Good practice principles  
  Andrés Pichon-Riviere, Natalie C. Soto, Federico Ariel Augustovski, Sebastián García Martí and Laura Sampietro-Colom

- **248** Stakeholder involvement in the health technology assessment process in Latin America  
  Andrés Pichon-Riviere, Natalie Soto, Federico Augustovski and Laura Sampietro-Colom

- **254** How can health systems prepare for new and emerging health technologies? The role of horizon scanning revisited  
  Wija Oortwijn, Laura Sampietro-Colom, Fay Habens and Rebecca Trowman

- **260** Historical development of the HTAsiaLink Network and its key determinants of success  
  Yot Teerawattananon, Karlena Luz, Chalarntorn Youhasmutra, Raoh-Fang Pwu, Jeonghoon Ahn, Asrul Akmal Shafie, Kalipso Chalkidou, Sripen Tantivess, Benjamin Santatiwongchai, Waranya Rattanavipapong and Saudamini Dabak

**Methods**

- **267** Patient priorities for treatment attributes in adjunctive drug therapy of severe hypercholesterolemia in Germany: An analytic hierarchy process  
  Axel C. Mühlbacher, Anika Kaczynski, Franz-Werner Dippel and Susanne Bethge

- **276** Health technology assessment methods guidelines for medical devices: How can we address the gaps? The International Federation of Medical and Biological Engineering perspective  
  Julie Polisena, Rossana Castaldo, Oriana Ciani, Carlo Federici, Simone Borsci, Matteo Ritrovato, Daniel Clark and Leandro Pecchia

- **290** Development of the Ontario decision framework: A values based framework for health technology assessment  
  Murray Krahn, Fiona Miller, Ahmed Bayoumi, Ann-Sylvia Brooker, Frank Wagner, Shawn Winsor, Mita Giacomini, Ron Goeree, Holger Schünemann, Gabrielle van der Velde, Stephen Petersen, Nancy Stikich and Irfan Dhalla

- **300** Challenges and methodologies in using progression free survival as a surrogate for overall survival in Oncology  
  Karla Hernandez-Villafuerte, Alastair Fischer and Nicholas Latimer

- **317** Environmental impact assessment of a health technology: A scoping review  
  Julie Polisena, Gino De Angelis, David Kaunelis and Ibáñez Gutierrez-Ibarluzea

**Assessments**

- **327** The gap between economic evaluations and clinical practice: A systematic review of economic evaluations on dabigatran for atrial fibrillation  
  Herbert J.A. Rolden, Gert Jan van der Wilt, Angela H.E.M. Maas and Janneke P.C. Grutters

- **337** Performance of smartphone-based digital images for cervical cancer screening in a low-resource context  
  Phuong Lien Tran, Caroline Benski, Manuela Viviano, Patrick Petignat, Christophe Combescure, Jeromine Jinoro, Josea Lea Herinianasolo and Pierre Vassilakos

- **343** Comparative effectiveness and safety between amphotericin B lipid-formulations: A systematic review  
  Luiza Raquel Grazziotin, Leila Beltrami Moreira and Maria Angelica Pires Ferreira
