A REFERENCE DOCUMENT

Neurological Registry
Best Practice Guidelines

A Peer-Reviewed Practical Guide to Patient Registry Development and Operations in Canada
Acknowledgements

This guideline document was developed as a part of the National Population Health Study of Neurological Conditions. We wish to acknowledge the membership of Neurological Health Charities Canada and the Public Health Agency of Canada for their contribution to the success of this initiative.

Funding for the study was provided by the Public Health Agency of Canada. The opinions expressed in this publication are those of the authors/researchers, and do not necessarily reflect the official views of the Public Health Agency of Canada.

The development of this guideline document would not have been possible without the assistance and expertise of the following individuals who participated in the guideline development process.

The Case for Neurological Registry Best Practice Guidelines in Canada

PART I

Registry Design

Ethical and Legal Considerations for Canadian Registries - Chapter I

Patient Recruitment by Neurological Registries - Chapter II

Neurological Registry Data Collection Methods and Configuration - Chapter III

Linkage Between Neurological Registry Data and Administrative Data - Chapter IV

Registry Data Storage and Curation - Chapter V

Online Neurological Registries - Chapter VI

PART II

Registry Quality

Neurological Registry Quality Control and Quality Assurance - Chapter VII

Validation and Interpretation of Neurological Registry Data - Chapter VIII

PART III

Registry Impact

Neurological Registry Feasibility and Sustainability - Chapter IX

Evaluation of Neurological Patient Registries - Chapter X

Common Data Elements for Neurological Registries - Chapter XI

APPENDICES

Literature Search Strategy - Appendix A

Glossary - Appendix B
