CONTENTS

Wensheng Cao, Algebraic convergence theorems of complex Kleinian groups 1
Coy L. May and Jay Zimmerman, The symmetric genus of 2-groups 9
Alvaro Nolla De Celis, G-graphs and special representations for binary dihedral groups in gl(2, C) 23
Sergio Estrada and Pedro A. Guil Asensio, Pure-injectives relative to a cotorsion pair: applications 59
Javad Mashreghi and Mahmood Shabankhah, Composition operators on finite rank model subspaces 69
Sean Sather-Wagstaff, Embedding modules of finite homological dimension 85
M. P. Harvey, Minor arc moments of weyl sums 97
Xiangdong Yang, Exponential polynomial approximation of weighted banach space on R^n 115
Anand K. Ghosh, Ricci solitons and contact metric manifolds 123
Vladimir S. Kuznetsov and Stefan Ruzkhannov, Two remarks on proj^*-projectivity of riemannian metrics 131
C. S. Khabutsu and B. P. Duggal, On weyl’s theorem for tensor products 139
Thomas Hüttemann and David Pauksztello, The co-stability manifold of a triangulated category 145
Peter Jørgensen and David Pauksztello, The co-stability manifold of a triangulated category 161
Shmuel Zeilnik, On crystal operators in lusztig’s parametrizations and string cone defining inequalities 177
A. L. Agore, Coquasitriangular structures for extensions of hopf algebras. Applications 201
Shahaboddin Meibodi, Toshikazu Adachi and Young Ho Kim, Characterisations of geodesic hyperspheres in a non-flat complex space form 217
Kei Ji Izuchi, Kou Hei Izuchi and Yuko Izuchi, Sums of weighted composition operators on cop 229
