The Journal of
Laryngology and Otology

(Inaugurated in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

Edited by NEIL WEIR
Assistant Editors CAROL WENGRAF, RICHARD RAMSDEN, PETER RHYS EVANS, DAVID PROOPS, VALERIE LUND, HENRY GRANT, ANDREW JONES & GUY KENYON

Book Reviews and Abstracts Editor JOHN B. BOOTH

Production Editors GILLIAN GOLDFARB & INGA McKENZIE

INSTRUCTIONS FOR AUTHORS

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this Journal solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made. Normally an original main article should not exceed 7500 words.

2. Manuscripts should be typewritten in duplicate on one side of the paper only (A4 297x210 mm) and double spaced, with wide margins.

3. Each component on a new page in the following sequence: title page, abstract, text, acknowledgements, references, tables and legends.
   (a) Abstract—This should contain not more than 150 words and include a statement of the problem, the method of study, results and conclusions; a ‘summary’ section should not be included in the main manuscript.
   (b) Key Words—only those appearing as Medical Subject Headings (MeSH) in the supplement to the Index Medicus may be used; where no appropriate words are listed those dictated by common sense/usage should be supplied.
   (c) Introduction—(1) introduction, (2) materials and methods, (3) results, (4) discussion, (5) conclusion.
   (d) A Table is to be used to present data in an appropriate way. Each Table should be typed on a separate sheet and give full details, thereby avoiding repetition in the text.
   (e) Illustrations—two sets of illustrations, one with each copy of the manuscript, must be submitted and all authors should remember that the single column width is 80mm. One set of illustrations should, therefore, not exceed this width and they should be arranged so that they are illustrated within this dimension. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

4. Editorial communications may be addressed to the Editor, Journal of Laryngology and Otology, c/o Headley Brothers Ltd., Ashford, Kent, pp 33–38.

5. Page proofs are sent to authors for corrections, which should be kept to a minimum; they must be clearly marked, and no corrections added. Proofs should be returned within 5 days.

6. Orders for reprints must be sent when returning page proofs, and for this purpose special forms are supplied.

7. The annual subscription is £65.00 Institutions & Libraries US$190.00; £65.00 Individuals US$170.00; £45.00 Registrars, Residents and Interns. (Those in training should submit a certificate from The Head of the Department giving details of their appointment; those who qualify must supply their home address for mailing direct). Claims to be made forMissing issues within 6 months of publication date.

8. SUPPLEMENTS published at ‘irregular’ intervals with subscription, available separately on request.

9. All subscriptions, advertising and business communications should be sent to the publishers, or subscription agents.

in association with

THE INSTITUTE OF LARYNGOLOGY AND OTOTOLOGY

are pleased to announce

THE 13th DOWNS TEMPORAL BONE DISSECTION PRIZE

photograph of the winning entry from N. Balaji 1992/93

The First Prize enables the winner to attend the Portmann Course in Microsurgery in Otology and Otoneurology at Bordeaux in July 1995.

The Second Candidate will receive Medical Books to the value of £225 and the Third Candidate to the value of £150.

Candidates eligible for this prize will be full-time SHO's, Registrars and Senior Registrars in clinical posts in Otology and Consultants appointed after 1st January 1995.

Submissions should consist of two dried temporal bones:

1) Dissected to demonstrate surgical approaches in the treatment of Menière's disease.
2) Dissected according to the candidates' own choice.

The Winner will be announced at the meeting of the Otology Section of the Royal Society of Medicine in May 1995.

The Judges are: Professor Tony Wright, Mr Tony Bull and Mr. Martin Bailey.

Further information is available from Mr. C. M. Bailey at the address below.

Entries must be sent to:
Mr. C.M. Bailey (c/o Mrs Glenice Gould, Research Secretary), at the address below. All temporal bones must be transported according to existing regulations, and must be received before 28th February 1995. No entries can be accepted after this date.

The latest addition to the Kamplex range incorporates many of the more popular features found on the best selling AD27 in a lightweight low cost package.

The attractive low profile design and easy-to-read back-lit display makes this a perfect desktop audiometer. Air Conduction, Bone Conduction and Narrow-band masking in 5dB steps are available together with an extremely useful talk-through facility.

Superbly engineered for reliability and portability (with the optional case), the AD25 also offers an automatic test facility.* A patient's audiometric results whether recorded manually or automatically may be stored and later recalled.

*Auto Threshold complies with ISO 8253, Audiometric Test Methods

- Robust and Portable (with optional carrying case)
- AC/BC/Narrow-Band Masking
- Pure, Warble and Pulsed Tones
- Clear, easy to read Back-lit Display
- Automatic Test Facility (Conforms to ISO 8253)
- Results Storage and Recall Capability
- Insert Masking
VERTIGO CONTROL

NON-SEDATIVE CONTROL

Presentation
A white, flat round tablet imprinted '267' on one face, "DUPHAR" on the reverse, each tablet containing 16mg betahistine dihydrochloride. Available in packs of 84 tablets. Basic NHS price £18.03. PL0512/0088.

Indications
Vertigo, tinnitus and hearing loss associated with Meniere’s syndrome.

Dosage and Administration
Adults (including the elderly): Initially one tablet three times daily, taken preferably with meals. Maintenance dose: 24–48mg daily. Children: No dosage recommendations are made for children.

Contra-indications:
Phaeochromocytoma.

Precautions:
Caution is advised in the treatment of patients with a history of peptic ulcer. Clinical intolerance to Serc in bronchial asthma patients has been shown in a relatively few patients and therefore caution should be exercised when administering betahistine to patients with bronchial asthma.

Legal Category
POM.
