## British Society of Animal Science

The British Society of Animal Production (now Animal Science) was established in 1943 with the aim of providing the opportunity for those with an interest in animals and animal production to exchange views, ideas and information.

It has developed into an energetic and active society with over 1300 members from over 30 countries throughout the world. Today as ever the Society is the natural meeting point for all of those with an interest in animal production. Its membership is drawn from research, education, advisory work, commerce and practical livestock industry.

The Society's Journal is *Animal Production* which publishes fundamental and applied research and is a major scientific title of international repute. Original research from basic and applied sciences relevant to all aspects of animal production can be found in it.

The Society organizes a major scientific meeting once a year and occasional specialist meetings on key issues facing animal production. If you would like to join or receive further information about the Society contact: The Secretary, BSAS, PO Box 3, Penicuik, Midlothian EH26 0RZ.

---

## Information for contributors to *Animal Production*

Detailed notes for guidance in the preparation of manuscripts are printed in Volume 53: pages i-vii.

A few general points are given below.

*Animal Production*, published six times a year in two volumes, prints reports in English, of original research in the basic and applied sciences relevant to animal production. The investigations generally relate to the fields of animal breeding, nutrition, reproduction, health, behaviour, welfare, environment and housing and their interrelationships and pertain to biological processes and functions and to animal products. Work may be in the basic disciplines related to these fields or at a whole animal or whole systems level. The approach can be experimental or theoretical provided the work has been carried out in a systematic way and, in the former case, in a way which is ethically acceptable. Articles critically re-examining published information will also be considered. Papers presenting a detailed description of a technique or of equipment will be considered. Papers in a series are not accepted unless all are presented at the same time. Results of research work which do not warrant presentation as a full paper may be submitted for consideration as Notes. Notes are not intended for the publication of interim results. They must not exceed 2250 words or the equivalent inclusive of tables and illustrations. A proprietary product used as a source of material in experimental comparisons should be described by the appropriate chemical name, with the trade name given in parenthesis in the **Material and methods** section only, if this is seen as helpful to the readers. Authors should be careful in adhering to appropriate procedures when working with proprietary products and when reporting the results obtained.

Papers are published on the understanding that they have not been and, with the exception of authors' abstracts, will not be published elsewhere without the editors' written permission. Authors' abstracts can be reproduced if full acknowledgement of the source is made.

*Manuscripts* should be written in English and typed or printed on one side of the paper in double-line spacing with wide margins. Each page and the lines on each page should be numbered. Three copies, one of which must be the original, of the manuscript and illustrations should be sent to:

Dr T. L. J. Lawrence

Animal Science, Division of Animal Husbandry,  
University of Liverpool Veterinary Field Station,  
Neston, South Wirral, England L64 7TE.

Manuscripts are not returned with proofs: authors should therefore retain copies.

*Units of measurement.* The International System of Units (SI) should be used with the recommendations and modifications in *Quantities, Units and Symbols*, Royal Society, London, 1972 — reproduced in *Proc.Nutr. Soc.* 31: 239-247, 1972.

*Symbols and abbreviations.* Authors should consult the notes prepared for guidance.

*Statistical significance.* Levels of statistical significance must be clearly indicated. Treatment means should be given with standard errors or standard errors of differences.

(Continued inside back cover)

Title page illustration by Dr Anne Hurst: from an ivory netsuke carved as a wild boar lying amongst leaves by Totamada, an 18th century artist of the Kioto school.

*Illustrations.* The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

a) Diagrams should be drawn in black ink, about twice the size of the finished block, on white paper or card, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be avoided as far as possible but if unavoidable it should be included on a fly-leaf.

b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the editors.

c) Colour plates are unlikely to be accepted unless the authors bear the cost.

*Tables* should be as simple and as few as possible. Each table should be typed on a separate sheet.

*Abstract.* Every paper should have a short abstract (not more than 250 words for a paper and 120 words for a note) complete in itself and understandable without reference to the paper. The abstract will be printed at the beginning of the paper and preferably should be in the format of unnumbered short paragraphs.

*Keywords.* Up to a maximum of five keywords selected from the *CAB Thesaurus* (1988) or from an equivalent reference volume should be listed at the end of the Abstract.

*References.* Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. The arrangement of references should be as in recent papers in *Animal Production*; details are given in the notes for guidance.

*Proofs* are supplied once and must be returned corrected to the editors within 3 days. Only essential corrections should be made.

*Reprints.* Twenty-five reprints of each paper will be supplied free of charge to authors on request. Further copies may be purchased if the order is sent at the proof-stage. Reprints are not supplied for notes.

*Annual subscription* is £130.00 (or \$240.00 in the USA and Canada) and the price for a single part is £22.00 (or \$40.00) net.

*Abstracts of papers presented at British Society of Animal Science winter meeting* are published as a separate section in the June issue of *Animal Production*.

*Correspondence* regarding subscriptions and sales (current and back numbers of the Journal) and any other enquiries, including those concerning copyright, should be addressed to: Durrant Periodicals, Winton Lea, Pencaitland, East Lothian, Scotland EH34 5AY.

*Senior editor*

T. L. J. Lawrence, University of Liverpool

*Editors*

J. A. M. van Arendonk, University of Wageningen

W. Haresign, University of Nottingham

C. L. Johnson, University of Leeds

I. J. Lean, Wye College, University of London

C. A. Morgan, Scottish Agricultural College, Edinburgh

J. D. Oldham, Scottish Agricultural College, Edinburgh

E. Owen, University of Reading

A. J. F. Webster, University of Bristol

J. D. Wood, University of Bristol

J. A. Woolliams, AFRC Roslin Institute, Edinburgh

*Technical editors*

Hilary Davies

Marie C. Pitkethly

*Notes to users in the USA.* The appearance of the fee codes in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use on the following conditions. The copier must pay the stated per-copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970, USA, for copying beyond that permitted by sections 107 and 108 of the US Copyright Law. For territories outside north America, permission should be sought direct from the copyright holder. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising and promotional purposes, for creating new collective works or for resale.

# ANIMAL SCIENCE

From 1995 Animal Production is changing its name to **Animal Science**.

Research at the molecular, cellular, organ or system levels will be considered equally with research involving whole animals, production systems and mathematical modelling.

Papers will be welcome on all relevant areas including:

- Breeding and genetics
- Nutrition and digestion
- Physiology and endocrinology
- Reproduction
- Lactation
- Growth
- Health
- Ethology and welfare
- Environment and housing
- Food evaluation
- Animal products

**Animal Science** will be published six times a year. Volume numbers will continue to run in the current series.
