Imperial College of Science and Technology

COURSES IN AGRICULTURAL CHEMISTRY and Allied Subjects

Fees £22. 10s. 6d. per annum

Students are prepared for the Higher Degrees of the University of London (by Research or Dissertation) and for the Fellowship of the Institute of Chemistry (Branch V.—Agricultural Chemistry).

Arrangements are made for the study of the Chemistry of Soils, Fertilizers, Feeding Stuffs, and Farm Products; Plant and Animal Nutrition, Insecticides, Fungicides, etc., and will include courses of lectures, laboratory instruction, together with demonstrations and practical work at the College Biological Field Station at Slough.

Intending students should apply to the Registrar

AN INTRODUCTION TO PLANT BIOCHEMISTRY

By

C. C. STEELE, M.A., B.Sc., Ph.D.

Sometime Lecturer in Chemistry at the Horticultural College
Swanley, Kent

This textbook forms a concise and up-to-date introduction to Plant Biochemistry for students of Botany, Agriculture and Biology in general. It bridges the gap which so commonly prevails in the teaching of the closely allied subjects of Organic Chemistry and Botany.

The book includes a description of many simple experiments which the author has successfully used to form a course of practical instruction.
