

Notes for authors

Papers to be considered for publication should be sent to the Society at 22 George Street, Edinburgh EH2 2PQ, Scotland.

A paper by more than one author must be submitted with a statement, signed by each author, to the effect that the paper in its entirety is approved by the joint authors and naming the author who will be responsible for correspondence with the Society.

Authors will receive fifty (50) offprints free of charge, this number to be shared between joint authors. Additional offprints may be obtained, in units of fifty, at a fixed scale of prices given on a form which will be attached to the proof.

Copyright

© 1980 The Royal Society of Edinburgh and the authors of individual papers.

It is the policy of the Royal Society of Edinburgh not to charge any royalty for the production of a single copy of any one article made for private study or research. Requests for the copying or reprinting of any article for any other purpose should be sent to the Royal Society of Edinburgh, 22/24 George Street, Edinburgh EH2 2PQ.

PROCEEDINGS OF THE ROYAL SOCIETY OF EDINBURGH

(Section A)

Volume 86

1980

Parts 1/2

CONTENTS

AALT DIJKSMA	
Eigenfunction expansions for a class of J -selfadjoint ordinary differential operators with boundary conditions containing the eigenvalue parameter	1
DAVID COLTON and RALPH KLEINMAN	
The direct and inverse scattering problems for an arbitrary cylinder: Dirichlet boundary conditions	29
IAN KIRKWOOD	
The isomorphism semigroup of a periodic abelian group	43
RAINER PICARD	
On convergence and error estimates for the horizontal line method applied to Maxwell's initial boundary problem in anisotropic, inhomogeneous media	53
CHRISTINE R. THURLOW and MICHAEL S. P. EASTHAM	
The existence of eigenvalues of infinite multiplicity for the Schrödinger operator	61
P. HOLGATE	
Genetic algebras for some inbreeding systems	65
KENNETH F. ANDERSEN	
Weighted inequalities for the Stieltjes transformation and Hilbert's double series	74
EINAR HILLE	
Differential operators of infinite order	85
PAUL ERDÖS	
Proof of a conjecture of Offord	103
H. SAIFLU and I. TWEDDLE	
From B -completeness to countable codimensional subspaces via the closed graph theorem	107
R. J. COLE	
Complementary bivariational principles for linear problems involving non-self-adjoint operators	115
VINOD B. GOYAL and PHILIP W. SCHAEFER	
Liouville theorems for a class of fourth order elliptic equations	129
WU-TEH HSIANG and MAN KAM KWONG	
A comparison theorem for the first nodal line of the solutions of quasilinear hyperbolic equations with non-increasing initial values	139
C. G. LYONS and J. D. P. MELDRUM	
N -series and tame near-rings	153
HANS L. CYCON	
On the stability of self-adjointness of Schrödinger operators under positive perturbations	165
