BRAINSTORMS
Mechanism of action of flibanserin, a multifunctional serotonin agonist and antagonist (MSAA), in hypoactive sexual desire disorder
Stephen M. Stahl

EDITORIALS
Kick-off editorial for 2015: thanks to our reviewers
Stephen M. Stahl

Enhancing our understanding of perinatal depression
Patrick R. Finley and Louann Brizendine

ORIGINAL RESEARCH
Detection and treatment rates for perinatal depression in a state Medicaid population
Michelle L. Geier, Nancy Hills, Marco Gonzales, Karoline Tum and Patrick R. Finley

Relationship of prenatal depression and comorbidities to infant outcomes
Heather A. Flynn, Nicole McBride, Aura Cely, Yuxia Wang and Julie DeCesare

How to switch to agomelatine after an unsuccessful try with paroxetine or venlafaxine
Michel Lejoyeux, Sophie Matharan and Christian de Bodinat

Antidepressant medication use, depression, and the risk of preeclampsia
Lyndsay Ammon Avalos, Hong Chen and De-Kun Li

REVIEW ARTICLE
The role of reproductive hormones in postpartum depression
Crystal Edler Schiller, Samantha Meltzer-Brody and David R. Rubinow

ABSTRACTS
2014 NEI Global Psychopharmacology Congress
Cover Image: The image on the cover shows a hypothetical model whereby glutamate is released from an intracortical pyramidal neuron and binds to an NMDA receptor on a GABA-ergic interneuron. GABA is then released and binds to receptors on the axon of another glutamate pyramidal neuron. This inhibits the neuron, thus reducing the release of cortical glutamate. The GABA interneuron and its NMDA synapse from the first neuron to the second is the hypothetical site of glutamate dysfunction in schizophrenia.

Aims and Scope
CNS Spectrums aims to be the premiere journal covering all aspects of clinical neurosciences, neurotherapeutics and neuropsychopharmacology. From 2012 the journal will primarily focus on the publication of authoritative, cross-disciplinary review and opinion material publishing advances and controversial issues with pertinence to the clinician. In particular we aim to publish reviews and articles in translational neuroscience, biological psychiatry and neuropsychopharmacology that explain clinically relevant neuroscience discoveries in a way that makes these findings accessible and understandable to clinicians and clinical investigators. We will emphasize new therapeutics of all types in clinical neurosciences, mental health, psychiatry, and neurology, especially first in man studies and proof of concept studies. Our focus will be not just drugs, but novel psychotherapies and neurostimulation therapeutics as well. CNS Spectrums will in addition, continue to publish original research and commentaries that focus on emergent areas of research. Subject coverage shall span the full spectrum of neuropsychiatry focusing on translational issues and those crossing traditional boundaries between neurology and psychiatry.

Submitting Manuscripts to CNS Spectrums
All submissions to CNS Spectrums should be prepared in accordance with the instructions for authors and in the style of the Journal. Manuscripts should be submitted through the dedicated CNS Spectrums ScholarOne Manuscripts website: http://mc.manuscriptcentral.com/cnsspectr

CNS Spectrums will consider and encourage the following types of articles for publication: Review Article—Comprehensive article summarizing and synthesizing the literature on various topics presented in a scholarly and clinically relevant fashion; Original Research—Reports the results of a clinical study and contains original research; Opinion—Address a current topic of high interest, which has substantial evidence but has not yet been established; Commentary—An article that is written in reaction to previously published articles; usually encouraging a level of debate; the journal will also include Brainstorms and Editorials that shall be commissioned or written by the Editor in Chief.

Instructions for Contributors
The Instructions for Contributors are available on the Cambridge Journals Online web site at: http://journals.cambridge.org/CNSifc

Indexing
CNS Spectrums is indexed by Index Medicus/MEDLINE and Web of Science (Thomson Reuters) as well as appearing in the annual Journal Citation Report. Introduced in 1996, the journal was acquired in whole by Cambridge University Press in November of 2011.

Subscriptions
Institutional print and electronic: £562/$891; Institutional electronic only: £421/$673.

Rights & permissions requests can be applied for online within each article by clicking “Request Permissions” within the table of contents or in the fulltext version of a specific article. Requests will be processed via the CCC Rightslink system and processed immediately.

CNS Spectrums (ISSN: Print 1092-8529; eISSN: 2165-6509) is published bimonthly by Cambridge University Press.

Postmaster
Send address changes in the U.S.A., Canada, and Mexico to CNS Spectrums, Cambridge University Press, Journals Dept., 100 Brook Hill Drive, West Nyack, NY 10994-2133, U.S.A. Send address changes elsewhere to CNS Spectrums, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England.

Online availability
CNS Spectrums is hosted on the Cambridge Journals Online (CJO) service at http://journals.cambridge.org/cns

Institutional subscribers: Access to full-text articles online is only granted to subscription options offering an online component. Subscriptions must be activated by the purchasing institution using the instructions provided at the time of purchase; see information for subscribers at: http://journals.cambridge.org/

Reprint and Advertising Sales
Inquiries for bulk reprint sales and placement of advertising should be sent to the Journals Sales Department of Cambridge University Press: USAdSales@cambridge.org
CJO Mobile (CJOm) is a streamlined Cambridge Journals Online (CJO) for smartphones and other small mobile devices

- Use CJOm to access all journal content including *FirstView* articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: journals.cambridge.org
