Contents

Regular papers
131 Introduction to the 24th international conference on logic programming special issue
MARIA GARCIA DE LA BANDA AND ENRICO PONTELLI
135 Abstract answer set solvers with backjumping and learning
YULIYA LIERLER
171 A general framework for equivalences in Answer-Set Programming by countermodels in the logic of Here-and-There
MICHAEL FINK
203 Functional answer set programming
PEDRO CABALAR
235 On the implementation of the probabilistic logic programming language ProbLog
ANGELIKA KIMMIG, BART DEMOEN, LUC DE BAEDT, VÍTOR SANTOS COSTA AND RICARDO ROCHA
263 Products of weighted logic programs
SHAY B. COHEN, ROBERT J. SIMMONS AND NOAH A. SMITH
297 Solving functional constraints by variable substitution
YUANLIN ZHANG AND ROLAND H. C. YAP
323 Detecting inconsistencies in large biological networks with answer set programming
MARTIN GEBSER, TORSTEN SCHAUER, SVEN THIELE AND PHILIPPE VEBER
361 Reasoning support for risk prediction and prevention in independent living
A. MILEO, D. MIRICO AND R. BISIANI
397 Automatic music composition using answer set programming
GEORG BOENN, MARTIN BRAIN, MARINA DE VOS AND JOHN FITTCH

Electronic manuscripts
should begin with an abstract of net not more than 300
words at the end of which are a few keywords. Authors should prepare
papers covering both the theory and the
practice of logic programming. Among the topics covered are AI
applications that use logic programming, logic programming
moralities, specification, analysis and verification of systems,
inductive logic programming, multi-relational data mining, natural
languages, knowledge representation, nonmonotonic reasoning, semantic
wean, databases, and constraint logic programming.
TPLP is the sole official journal of the Association for Logic Programming
(http://logicprogramming.org) and is available to its members at a preferential rate. It is also
published by SPARC, the Scholarly Publishing & Academic Resources Coalition
(URL: www.arl.org).

Submission of manuscripts
Electronic submissions: The preferred form of submission is to send
two small messages, the first one with the information containing the
title, the author(s), and the abstract of the submission, and the sec-
second one with a Postscript file. Both emails should be sent to the
appropriate Area Editor with a copy to the Editor-in-Chief. If in doubt
about the most appropriate area, contact the Editor-in-Chief.

Paper submissions: These are also acceptable, but their handling
may be delayed (four copies to the appropriate Area Editor and one
copy to the Editor-in-Chief). The submitted manuscripts should not be published or simul-
taneously submitted to another journal or to a conference. Full
versions of important conference papers are welcome. Upon accep-
tance of an article by the journal, the author(s) will be asked to
d Transfer copyright of the article to Cambridge University Press.

Book Reviews
Books for reviews, or suggestions for reviews, should be sent to
the book reviews editor.

Technical notes
Technical notes should not exceed 500 words in length, excluding
headings, tables, figures, and the bibliography. They are often
quite technical and should be submitted, preferably electronically, to
the Technical Notes editor. Submission includes an abstract and a reasonable
accurate title or keywords for the paper (excluding tables and figures, and the
bibliography).

Electronic manuscripts
The publisher encourages the submission of final manuscripts written in
LaTeX which can be used for direct typesetting. Authors can down-
load styles from the CUP anonymous ftp site in a packed or unpacked form.
The packed form is available from:
ftp://ftp.cambridge.org/pub/arlis/journals/tech-notes/ and
the unpacked files are in a directory / unpacked.
