First published online: 12 February 2020

This paper (Wu 2016), which was published in *AI EDAM* online on August 22, 2016, has been retracted by Cambridge University Press as it is very similar in content to a published ASME Conference Proceedings paper. The article in question and the ASME Conference Proceedings paper were submitted for review with *AI EDAM* and the ASME at similar times, but copyright was assigned to ASME before the paper was accepted in *AI EDAM* and therefore the article in *AI EDAM* is being retracted.
