Network Science is an important journal for an important discipline – one using the network paradigm, focusing on actors and relational linkages, to inform research, methodology, and applications from many fields across the natural, social, engineering and informational sciences. Given growing understanding of the interconnectedness and globalization of the world, network methods are an increasingly recognized way to research aspects of modern society along with the individuals, organizations, and other actors within it. The discipline is ready for a comprehensive journal, open to papers from all relevant areas. Network Science is a defining work, shaping this new discipline. The journal welcomes contributions from researchers in all areas working on network theory, methods, and data.

MANAGING EDITOR
Denise Weber, ETH Zürich, Switzerland
CONTENTS

Introduction to the special issue on COMPLEX NETWORKS 2019
HOCINE CHERIFI AND LUIS M. ROCHA S1

Original Articles

Gradient and Harnack-type estimates for PageRank
PAUL HORN AND LAUREN M. NELSEN S4

Learning to count: A deep learning framework for graphlet count estimation
XUTONG LIU, YU-ZHEN JANICE CHEN, JOHN C. S. LUI AND KONSTANTIN AVRACHENKOV S23

On the impact of network size and average degree on the robustness of centrality measures
CHRISTOPH MARTIN AND PETER NIEMEYER S61

Isolation concepts applied to temporal clique enumeration
HENDRIK MOLTER, ROLF NIEDERMEIER AND MALTE RENKEN S83

A simple differential geometry for complex networks
EMIL SAUCAN, AREEJIT SAMAL AND JÜRGEN JOST S106

Sampling methods and estimation of triangle count distributions in large networks
NELSON ANTUNES, TIANJIAN GUO AND VLADAS PIPIRAS S134

Logic and learning in network cascades
GALEN J. WILKERSON AND SOTIRIS MOSCHOYIANNIS S157
