

*ENV spiral bevel gears used in Westland S 55 main rotor drive*

# ENV

## for Gears

Specialists in precision gears for piston-engines and gas turbines, helicopter drives, accessory drives and flying controls  
 Spur and helical gears and spiral bevel, zerol and hypoid gears are supplied with profile ground teeth when required

The Bristol Type 171 Sycamore Helicopter uses LAYRUB as the main drive between engine and rotor

Layrub couplings use rubber trunnion blocks as the main driving elements giving a fully cushioned drive. As there are no metal to metal contacts no lubrication is required therefore little or no maintenance

Other well known British aircraft on which Layrub is used either as auxiliary or main drive include Bristol Type 173 Helicopter and Bristol Britannia

A post card will see full technical data on its way to you

**AT ITS BEST**

## ROTODYNE

**FAIREY**  
**ROTODYNE**

- ★ The Rotodyne will be the first large transport aircraft to offer high cruising speed with the ability to operate from small landing sites
- ★ The Rotodyne, being independent of conventional runways, will bring the advantages of air transport to almost any locality
- ★ The Rotodyne will carry 11,000 lb or 44 passengers at overall speeds and costs comparing favourably with fixed-wing aircraft
- ★ The Rotodyne will more than meet all I A T A safety regulations
- ★ The Rotodyne is powered by two Napier Eland propeller - turbines, with tip jet propulsion for take-off and landing

## ***Helping to design the world's Aircraft***

*ROTAX are highly experienced in designing and manufacturing complete electrical and starting systems for aircraft of every type. This company has made its contribution to the vast advances in helicopter design during the last ten years. The size and scope of the facilities ROTAX can offer the designer of fixed or rotary-wing aircraft are unique.*

**ROTAX**

***Complete Electrical and  
Starting Systems for Aircraft***

*Consult ROTAX at the design stage. Supreme in its specialised field of aeronautical engineering, ROTAX offers the designer after sales maintenance and complete technical information services.*

Selected by the Royal Navy and  
the Royal Air Force

### the GAZELLE 1,260-2,000 s.h.p. Gas Turbine Engine

This rugged new free turbine engine of notable performance for gas turbine-powered helicopters will power the twin rotor Bristol 192, adopted by the Royal Air Force and the Westland 'Wessex' helicopter, adopted by the Royal Navy

The engine embodies the safe, simple Napier automatic control system

For ease of installation it can be mounted in any position between the vertical and horizontal

Helicopters demand tough, reliable engines—the GAZELLE is designed for strenuous duty, long life between overhauls, while its outstanding simplicity means easy maintenance and economical operation

Designers and manufacturers of Rocket Engines and Ram Jets

## YOUR JOURNALS

The Binders illustrated, in which the Association Journals can be readily clipped for preservation and easy reference, are available from the Association's Offices

**4 The Sanctuary,  
Westminster, S W 1**

Each Binder will hold 8 Journals covering two volumes

The price is 13/9 (Post free), and this includes the Title in gold lettering on the spine

*The Council of The Helicopter Association of Great Britain  
wish to record their appreciation of Advertisers' support*
