Parasitology

is one of over 50 learned journals published by Cambridge University Press.

A descriptive catalogue of Cambridge journals including details of back volumes is available from the London and New York offices of the Press.

Cambridge journals may be ordered from a bookseller or direct from the publishers.

Progress in Parasitology

P. C. C. Garnham

In this discussion of topics central to the understanding of zoonosis, Professor Garnham first stresses and then applies to a consideration of many diseases the concepts of natural focus, dynamic or evolutionary pattern, and contrasting severity of infection. The study includes an examination of the parasitologist's own problems and risks, and gives an account of important centres of research and of the lives of some great parasitologists. 

HEATH CLARK LECTURES 1968

0 485 26321 1 £3.00

Cambridge Biology Journals

Annals of Applied Biology Chairman of the Editorial Board: W. G. KEYWORTH. Published nine times a year.
Annual subscription £15 (US$49.50)

Biological Reviews of the Cambridge Philosophical Society Editor: E. N. WILLMER, F.R.S. Published quarterly.
Annual subscription £8 (US$26.50)

Journal of Cell Science Editors: A. V. GRIMSTONE and H. HARRIS, F.R.S. Published bimonthly.
Annual subscription £22 (US$70)

Annual subscription £12 (US$39)

Annual subscription £22 (US$70)

NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English. Papers should be sent to Dr H. D. Crofton, Department of Zoology, University of Bristol, Woodland Road, Bristol BS8 1UG.

GENERAL. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in Parasitology may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible. Attention to the following instructions will assist rapid publication:

TYPESCRIPTS. Papers should be typewritten with double spacing, on one side of quarto paper leaving a margin of about 4 cm. on the left-hand side of each sheet. Sheets should be numbered consecutively. Heavily corrected typescripts may have to be returned to the author for retyping. 12-5 cm. They must be drawn in India ink on white Bristol Board, heavy drawing paper or tracing paper, trimmed and mounted on white card and be avoided wherever possible so that the details can be readily understood without reference to an explanatory key. Properly prepared scraperboard drawings may be suitable for reproduction as line drawings, but drawings with graduations of shading (e.g. washdrawings) are not. Please try to avoid creasing or folding illustrations. Legends to illustrations must be given on a separate sheet of paper, but scales of magnification should be given along-side the illustrations. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their approximate positions indicated in the margin of the typescript. It is very convenient if photographs of illustrations are sent with the papers in addition to the original figures; they are essential when the originals are very large, so that they may be sent through the post to referees.

TABLES should be kept to a minimum and the duplication of information in tables and graphs, avoided. They should be typed on separate sheets of paper and their approximate positions indicated in the margin of the typescript. Each table should be numbered and be designed to be printed in the normal orientation of the text with the data so grouped as to make the use of rules unnecessary, whenever possible.

NOMENCLATURE. Authors should follow the International Rules of Nomenclature in the names of organisms. When new names are introduced the recommendations of the International Code of Zoological Nomenclature, 1964, should be strictly adhered to, especially with regard to the designation of types and statements as to where such types are deposited.

REFERENCES should be given only when cited in the text and should be listed in alphabetical order at the end of the paper, in the following form:
Surname of author(s) initials year of publication; title of paper; title of journal in full; volume number; first and last page numbers of the work cited. When books are listed, the title of the book should be underlined and it should be followed by the town of publication and the name of the publisher.

Where there is more than one reference to a particular author or group of authors with the same date, references should be distinguished by letters placed after the date, the letter a being used for the first reference cited and so on.

PROOFS sent to authors are already in page form and only essential corrections should be made on them. Excessive alterations, other than corrections of printers’ errors, may be disallowed or charged to the author; they are in any case liable to delay publication. Correction should be made using the same date, references should be distinguished by letters placed after the date, the letter a being used for the first reference cited and so on.

OFFPRINTS. Twenty-five offprints of each paper are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.

MORE DETAILED INFORMATION on the preparation of manuscripts for publication is to be found in the following:
