**Editor-in-Chief**

C. Gyles, University of Guelph, Canada

*Animal Health Research Reviews* provides an international forum for the publication of reviews and commentaries on all aspects of animal health. The journal covers all facets of animal health and science, including but not limited to both infectious and non-infectious diseases in domestic and wild animals.

**Senior Executive Editor**

T. F. C. Mackay, North Carolina State University, USA

**Executive Editors**

D. J. Finnegan, University of Edinburgh, UK

W. G. Hill, University of Edinburgh, UK

Shizhong Xu, University of California, USA

*Genetics Research* is a key forum for original research on all aspects of genetics. Building on the success and history of its previous incarnation, *Genetical Research*, the journal has a publishing remit that provides comprehensive coverage of subjects vital to the field.

The breadth and quality of papers, reviews and book reviews make the journal invaluable to geneticists, evolutionary biologists, plant and animal breeders and molecular biologists.

**Editor-in-chief**

P.C. Calder, University of Southampton, UK

*British Journal of Nutrition* is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

# CAMBRIDGE BOOKS ONLINE

EXCELLENCE IN E-PUBLISHING

Innovative access to thousands of titles from one of the world's oldest, most prestigious publishers

*Cambridge Books Online* offers eBook content within a richly functional, fully searchable online environment. Access to *Cambridge Books Online* content is via institutional purchase, allowing unlimited concurrent users, meaning anyone who wants to may access the resource 24 hours a day

## Key Features

- Dynamic content and feature set
- Flexible purchase plans and custom packages
- Powerful search & browse capabilities
- Comprehensive library support tools
- Extensive user functionality
- Enhanced discoverability tools

Free 30 day trials are available to libraries and institutions

For more information on *Cambridge Books Online*, to request a free trial or for a quote, please visit [ebooks.cambridge.org](http://ebooks.cambridge.org) or contact us:

## Notes for Authors

*Comparative Exercise Physiology (CEP)* provides a forum for presenting the results of research related to understanding and improving animal exercise and performance. Research into all animals, including humans, will be welcome. The key areas the journal will concentrate on include: exercise physiology, biomechanics and gait (including the effect of riders), nutrition and biochemistry, rehabilitation, psychology and behaviour, breeding and genetics. Other areas for consideration include pharmaceuticals and doping, ageing, environment, transport and any other research relevant to exercise and athletic performance.

### Styles of Paper

*CEP* publish four types of paper:

- 1) Full research papers. A full account of a complete project with experimental details.
- 2) Short communications. A preliminary account of exciting new results for which work is ongoing. Indicative experimental summaries should be included.
- 3) Research notes. Short accounts of small projects that might not merit a full paper (e.g. undergraduate research projects or minor aspects of a Ph.D. thesis). These might include technical notes.
- 4) Reviews. Literature overviews of recent research in a larger subtopic or comparative reviews of related work in different species.

In addition to these four types we also welcome 'Letters to the Editor' with comments on recently published papers to encourage a dialogue between readers and researchers.

*Please indicate the type of paper you are submitting.*

### Technical and Nomenclature Standards

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

### Peer Review

All contributions will be reviewed by at least two referees to ensure both accuracy and relevance. You should submit the names and contact details (including email addresses) of at least two, and up to four, potential referees for your paper.

### Submission of Manuscripts

Manuscripts should be submitted online via our manuscript submission and tracking site, [www.edmgr.com/cep](http://www.edmgr.com/cep). Full instructions for electronic submission are available directly from [journals.cambridge.org/CEP](http://journals.cambridge.org/CEP). To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current email address when registering to use the system.

### Final Manuscript Preparation

If your paper is accepted, you should supply the final paper as a Word document with separate figure files to [exercise@cambridge.org](mailto:exercise@cambridge.org). When submitting the final version please specify the software used for word processing and illustrations and identify the operating system used (PC, Mac, Unix etc). We kindly ask that you follow the instructions below for the final version. Please use double line spacing and ample margins and separate each paragraph by a blank line, numbering each page. Do not indent the start of each paragraph or use underlining. Please use italics for taxonomic nomenclature, bold for headings and standard abbreviations (e.g. Fig. and Figs) and SI units.

### Arrangement of Papers

Please arrange your paper in the following order:

- 1) Title page. Article title, authors addresses (one author should be identified for correspondence), and abstract.
- 2) The text, divided under appropriate headings.
- 3) Acknowledgements (if any).
- 4) References.
- 5) Tables (each on a separate sheet).
- 6) Captions to illustrations (group on a separate sheet or sheets).
- 7) Illustrations, each on a separate sheet or as separate files.

### Tables

Tables should be in a simple form. They should not be used if text or illustrations give the same information. Each table must be accompanied by a clear and concise caption.

### Illustrations

Please ensure text figures, line drawings, computer-generated figures and graphs are of sufficient size and quality to allow for reduction. Please avoid the use of grey tints or complex hatching and only use halftone photographs where they make a real contribution to the text. Please inform the Editor at the earliest opportunity if you wish to use colour illustrations (we will ask you to pay in advance for the use of colour, but we can advise on how this can be kept to a minimum).

### References

References should be in the Vancouver system, i.e. sequential numbering in the text and corresponding reference list. Reference numbers should be raised superscripts.

You should use the following conventions when providing the full citations in the reference list.

1 Shibata I, Mori M and Uruno K (1997). Experimental infection of maternally immune pigs with porcine reproductive and respiratory syndrome (PRRS) virus. *Journal of Veterinary and Medical Science* **60**: 1-13.

2 Sanderson CJ (1999). Cytokines active on eosinophils. In: Makino S and Fukuda T (eds) *Eosinophils: Biological and Clinical Aspects*. Boca Raton: CRC Press, pp. 274-287.

3 Dalton JP (1999). *Fasciolosis*, p. 57. Wallingford: CABI Publishing.

### Ethics

The authors must demonstrate that the experimental procedures employed conform to the accepted principles of animal welfare in experimental science. Please see the CEP website for more details ([journals.cambridge.org/cep](http://journals.cambridge.org/cep)).

### Copyright

Papers are accepted papers on the understanding that the work has been submitted exclusively to the journal and has not been previously published. Authors will be supplied with a transfer of copyright form with their proofs, this must be completed and returned to the Publisher.

Note that it is the author's responsibility to ensure that permission has been obtained from the copyright owner if you wish to reuse any figures or illustrations from previously published work.

### Proofs

We will contact, and send page proofs for correction, to the first named author unless you indicate otherwise.

### Offprints

The corresponding author will be sent a PDF file of the final published article for use. There will also be an option to purchase offprints.

For a more detailed Notes for Authors please visit: [journals.cambridge.org/cep](http://journals.cambridge.org/cep)

# COMPARATIVE **EXERCISE** PHYSIOLOGY

## CONTENTS

### SHORT COMMUNICATIONS

**Maximal lactate steady state for aerobic evaluation of swimming mice**

CA Gobatto, F de Barros Machado-Gobatto, LG Carneiro, GG de Araujo and IG Masselli dos Reis

99–103

**Detection of pegylated epoetin  $\beta$  in horse plasma after intravenous administration**

DH Catlin, GA Maylin, S Benchaar, SM Neades, MS Timmons and KH McKeever

105–108

**Endoscopic appearance of the glossoepiglottic fold of normal horses**

HW Jann, JCA Hart, VJ Moorman and MS Davis

109–112

### RESEARCH PAPERS

**Heart rate, net transport cost and stride characteristics of horses exercising at walk and trot on positive and negative gradients**

RJ Williams, KJ Nankervis, GR Colborne, DJ Marlin and RC Schroter

113–119

**Neither age nor osteoarthritis is associated with synovial fluid antioxidant disturbance or depletion in the horse**

RC Murray, CM Deaton, NC Smith, WE Henley and DJ Marlin

121–128

**A comparison of the metabolic cost of the three phases of the one-day event in female collegiate riders**

M Roberts, J Shearman and D Marlin

129–135
