Law is usually understood as an orderly, coherent system, but this volume shows that it is often better understood as an entangled web. Bringing together eminent contributors from law, political science, sociology, anthropology, history and political theory, it also suggests that entanglement has been characteristic of law for much of its history. The book shifts the focus to the ways in which actors create connections and distance between different legalities in domestic, transnational and international law. It examines a wide range of issue areas, from the relationship of state and indigenous orders to the regulation of global financial markets, from corporate social responsibility to struggles over human rights. The book uses these empirical insights to inform new theoretical approaches to law, and by placing the entanglements between norms from different origins at the centre of the study of law, it opens up new avenues for future legal research.

NICO KRISCH is a professor of international law at the Graduate Institute for International and Development Studies in Geneva.
GLOBAL LAW SERIES

The series provides unique perspectives on the way globalization is radically altering the study, discipline, and practice of law. Featuring innovative books in this growing field, the series explores those bodies of law which are becoming global in their application, and the newly emerging interdependency and interaction of different legal systems. It covers all major branches of the law and includes work on legal theory, history, and the methodology of legal practice and jurisprudence under conditions of globalization. Offering a major platform on global law, these books provide essential reading for students and scholars of comparative, international, and transnational law.
