SMITH'S AVIATION INSTRUMENTS

Smith's Statoscope.

As a proof that Smith's Instruments are preferred by the world's leading aviators, it is interesting to note that they were used on the flight to Australia, the Atlantic Flight, the Double Atlantic Flight of the R.34, while every machine in both the 1921 and 1922 Aerial Derbys was equipped with Smith Instruments, including the winner, Mr. J. H. James, on the Gloucestershire Mars 1.

It is a significant fact that whenever a world's record or big international flight takes place Smith's Instruments are invariably fitted to the winning machine. Their reliability and accuracy has gained for them the reputation of being the leading aircraft instruments of the world.

Smith's Petrol Level Indicator.

Campbell Bennett Aperiodic Compass.

Smith's Aviation Instruments are entirely British made at their fine factory at Cricklewood, London, N.W.2, and include Revolution Indicators, Airspeed Indicators, Altimeters, Pressure Gauges, Petrol Level Indicators, etc., etc., in fact, every aviation need is fully catered for.

S. Smith & Sons (M.A.) Ltd., Cricklewood Works, London, N.W.2.

Cables: Speedofac, London.
