

## piezosystem jena Inc.

For over 20 years, piezosystem jena has continued to be one of the leading innovators in the field of piezo actuators and stages. Our company develops and manufactures cutting-edge micro- and nanopositioning equipment for precision applications such as microscopy. One of the flagship product lines by piezosystem jena is the MIPOS series of microscope objective positioners. The MIPOS models offer a compact design, sub-nanometer precision and motion up to 600  $\mu\text{m}$ . There are even solutions for positioning complete lens revolvers (MIPOS R120). Piezosystem jena also offers a variety of highly precise piezo stages which are ideal for probe positioning. Low noise amplifiers for controlling the MIPOS series and other piezo positioners are also available. Upon request, all products can be customized according to specific requirements.

- MIPOS Series
- nanoMIPOS
- MIPOS 20
- MIPOS 100
- MIPOS 250
- MIPOS 500
- MIPOS 600 SG OEM
- MIPOS R120
- MIPOS 16-158
- MIPOS Accessories

Companies and research institutions all over the world value the precision and reliability of piezo positioning equipment by piezosystem jena. Markets in which the company is active in include the medtech, optical, precision engineering, aerospace and semiconductor industries, among many others.

### How to find us

piezosystem jena Inc.  
2B Rosenfeld Drive  
Hopedale, MA 01747
