STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the SSLA website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in SSLA). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit of regular research articles; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in SSLA.
Cambridge Core

The new home of Cambridge Journals

cambridge.org/core
We are the world’s leading publisher in language and linguistics, with a wide-ranging list of journals and books covering the scope of this discipline.

Our publishing encompasses theoretical, applied and sociolinguistics, and represents a breadth of subfields, including grammar and syntax, phonetics and phonology, semantics and pragmatics, historical linguistics, discourse and conversation analysis, psycholinguistics and neurolinguistics, and first and second language acquisition.

Our acclaimed book list includes state-of-the-art monographs as well as major reference works, guides to research methods, and textbooks at all levels.

RESEARCH ARTICLE

Observing Pitch Gestures Favors the Learning of Spanish Intonation by Mandarin Speakers
Chenjie Yuan, Santiago González-Fuente, Florence Baills, and Pilar Prieto

Observing and Producing Pitch Gestures Facilitates the Learning of Mandarin Chinese Tones and Words
Florence Baills, Nerea Suárez-González, Santiago González-Fuente, and Pilar Prieto

Advanced Second Language Learners’ Perception of Lexical Tone Contrasts
Eric Pelzl, Ellen F. Lau, Taomei Guo, and Robert DeKeyser

Learning Direction Matters: A Study on L2 Rhythm Acquisition by Dutch Learners of Spanish and Spanish Learners of Dutch
Lieke van Maastricht, Emiel Krahmer, Marc Swerts, and Pilar Prieto

Dominance, Proficiency, and Spanish Heritage Speakers’ Production of English and Spanish Vowels
Christine Shea

Influence of the Native Language on Sensitivity to Lexical Stress: Evidence from Native Arabic and Hebrew Speakers
Osnat Segal and Liat Kishon-Rabin

The Role of Acoustic Cues and Listener Proficiency in the Perception of Accent in Nonnative Sounds
Nikola Anna Eger and Eva Reinisch

Aptitude, Experience, and Second Language Pronunciation Proficiency Development in Classroom Settings: A Longitudinal Study
Kazuya Saito, Yui Suzukida, and Hui Sun

RESEARCH REPORT

Does Having Good Articulatory Skills Lead to More Fluent Speech in First and Second Languages?
Nivja H. De Jong and Joan C. Mora
