LONDON MATHEMATICAL SOCIETY
Journal of Applied Probability

This is an international journal published by the Applied Probability Trust in association with the London Mathematical Society; it contains research and review papers on applications of Probability Theory to the biological, physical, social and technological sciences. An annual volume of approximately 600 pages will be published in three numbers appearing in April, August and December.

Submission of papers

Submissions to the Journal may be of three kinds:

1. review papers of about 40–50 printed pages in length, surveying a field of Applied Probability; these will be paid for on acceptance at the rate of £100 (US$280) and may possibly be published later in paperback form;

2. research papers;

3. short communications of 2–3 printed pages in the nature of notes or brief accounts of work in progress.

These should be sent to any one of
